Effective Early Learning Case Studies In Improvement Zero To Eight Series:

Leading Practice in Early Years Settings Mary E Whalley, Shirley Allen, 2011-06-13 To achieve Early Years Professional Status candidates must demonstrate that they have effectively led the professional practice of their colleagues across the 0-5 age range. The second edition of this popular text helps Early Years students and experienced practitioners develop the knowledge, skills and confidence to do just that. It explains the nature of leadership and the EYP's role in promoting good practice and appropriate values and principles. This new edition has been fully revised and updated and includes new chapters on leading practice in a multi-professional context and the leader of practice as an agent of change. **Effective Early Learning** Christine Pascal, Tony Bertram, 1997-01-15 In this book the editors discuss criteria and methodologies for evaluating and improving the quality of learning and show how to evaluate practice and create action plans for improvement. The editors present a variety of case studies including a family center LEA nursery unit, a workplace nursery, an LEA nursery class, an inner city reception class in a primary school, private day nurseries and a social services day nursery. Each example is accompanied by a set of questions which highlight important features of the research process and suggest ways in which early years practitioners can examine and reflect on their own practice. *Drawing and Painting* John Matthews, 2003-04-22 The author questions inherited wisdom about children's development in visual representation and explains different models of development in visual expression. **Developing Learning in Early Childhood** Tina Bruce, 2004-02-17 This book is useful for students and lecturers of early childhood. It provides concise overviews of relevant research of early childhood, development theories of play and can be utilised as a contemporary reference book by a range of professionals. Debate: The chapter on young children becoming symbol users makes a valuable contribution to the literature and I shall be inspired and haunted in equal measure by the plea that epitomises this book and its story: Marian Whitehead. *Early Years* It's an excellent and easy-to-read text to read, blending theory and research with practice. Each chapter format is clear with the key themes outlined at the beginning, the main body followed by useful and thought-provoking questions for good practice to ponder and relevant further reading at the end. *Nursery World* Tina Bruce clearly loves children and delights in their development. She has produced an academic work which is both sensitive and stimulating but decidedly unpreachy. *Kirsty Wark* Broadcaster This book shows how adults can support children and actively help them develop their learning in early childhood. *Drawing* on traditional approaches as well as recent research and theories. Tina Bruce shows the need for balance in early years education and care between the biological and socio-cultural aspects of the development of learning. The book includes a wide range of examples from practitioners including nursery teachers, health visitors and community workers. Features include what does it mean to develop learning, learning by doing, real things, how language helps creativity and imagination, diversity and inclusion. This book is essential for students, practitioners and tutors of Foundation Degrees and Early Childhood Studies Degrees. The 0-8 series edited by Tina Bruce deals with essential themes in early childhood which concern
