**Effective Educational Leadership** Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25 Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate. Tim Brighouse's *Times Educational Supplement* its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s. Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs. I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership. Its greatest contribution is its exploration of the links between effective leadership and effective education. The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades. There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration. *Journal of Educational Administration Leadership* is the theme of this decade. This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform. A great and timely collection. Michael Fullan, Dean OISE, University of Toronto. This book makes an excellent contribution to the current debate on Educational Leadership. It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels. Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality. The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader and to the professional provider of CPD in leadership offering a wealth of information that can be practically adopted and adapted for a range of courses. Stephen Merrill, *Journal of Inservice Education*. Educational management and administration studies focus on leadership as a key determinant of effective educational institutions and currently much leadership preparation is characterized by a rational skills focused approach. Placing current thinking in leadership studies in its organizational and historical context this book explores its implications for leadership preparation, leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice. It draws on literature and research from both the private and public sectors. It is deliberately international in its content and focus and examines a range of practice both within and outside education. Each chapter has a short introduction by the editors setting it in context. This book is for providers and students in higher educational institutions for postgraduate level courses in educational management and for leadership development provision for Headteachers induction programmes NPQH and LPSH. It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools, colleges and other educational organizations.

*The Assistant Principal* L. David Weller, Sylvia J. Weller, 2002. A unique guidebook, training tool and reference work for new and experienced administrators. The role of the assistant principal is one of the least researched and
