Turning Average Instruction Into Great Instruction John O'Connor, 2009-01-16 Turning Average Instruction into Great Instruction details a clear and concise approach to school improvement focusing school leaders on the critical factor that has the greatest impact on student achievement classroom instruction Decades of research demonstrate that what happens between teachers and students in

our nation's classrooms has the greatest impact on how well those students learn. The current trend in school reform is to tackle all aspects of a school in order to improve student achievement, forcing school leaders to attempt to focus on the school culture, use of materials, community relations, teachers' pre-service training, the school's physical design, classroom decorations, and instruction. Unfortunately, such a wide scope leads to a lack of focus among school staff. With his singular focus on classroom instruction, what O'Connor suggests is an antithesis to that approach. School leaders will develop a common understanding of the high-impact instructional components that should be seen in every classroom. O'Connor maps out how school leaders can align all personnel to systematically build training, support, and monitoring mechanisms that ensure that effective instruction becomes part of every classroom routine. Evaluation Systems Thomas Kane, Kerri Kerr, Robert Pianta, 2014-06-03. WHAT IS EFFECTIVE TEACHING? It's not enough to say "I know it when I see it" not when we're expecting so much more from students and teachers than in the past. To help teachers achieve greater success with their students, we need new and better ways to identify and develop effective teaching. The Measures of Effective Teaching (MET) project represents a groundbreaking effort to find out what works in the classroom. With 15 original studies, some of the field's most preeminent experts tap the MET project's unprecedented collection of data to offer new insights on evaluation methods and the current state of teaching in our schools.
