LaFasto,Carl Larson,2001-08-21 What makes some teams achieve extraordinary outcomes while other fall disappointingly short of the mark Frank LaFasto and Carl Larson have systematically explored that question for more than 20 years In 1989 they published the best selling book TeamWork What Must Go Right What Can Go Wrong which reported the results of an in depth study of some of the most successful teams in recent history and identified the eight characteristics of high performance teams When Teams Work Best advances this groundbreaking research by probing more deeply inside the workings of hundred of teams some effective and some faltering For over a decade the authors collected and analyzed responses from more than 6 000 team members and leaders across a variety of industries in both public and private sectors to find out exactly what conditions help or hinder teams in achieving their goals The voices of these team members often eloquent always enlightening are heard through the quotations that appear throughout the book   Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek,Joachim Funke,Magda Osman,Annette Kluge,2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community

The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained   Emotion-Centered Problem-Solving Therapy Arthur M.
