Effectiveness Of International Environmental Agreements A Survey Of Existing International Instruments:

The Effectiveness of International Environmental Agreements Peter H. Sand, 1992-06-01 This is the only work to bring together the final versions of the thirteen major research papers commissioned for the United Nations Conference on Environment and Development UNCED Rio de Janeiro June 1992 providing an authoritative and detailed survey and analysis of the effectiveness of 124 existing international agreements and instruments to protect the environment

The Effectiveness of International Environmental Agreements Peter H. Sand, 1992-10 First published in 1990 this is a reissue of Professor Hilary Putnam's dissertation thesis written in 1951 which concerns itself with The Meaning of the Concept of Probability in Application to Finite Sequences and the problems of the deductive justification for induction Written under the direction of Putnam's mentor Hans Reichenbach the book considers Reichenbach's idealization of very long finite sequences as infinite sequences and the bearing this has upon Reichenbach's pragmatic vindication of induction

Evolution of International Environmental Regimes Simone Schiele, 2014-06-12 Using the international climate regime as an example Simone Schiele analyses the ability of international environmental regimes to evolve over time

International Law and the Antarctic Treaty System Arthur Watts, 1992-10 This book provides an invaluable up to date survey of the legal framework for Antarctic activities written by an author with direct practical experience of the Antarctic Treaty system Reflecting the increase of activity in the area the work examines the basic Antarctic Treaty of 1959 and the subsequent major additional treaties and regulatory measures to provide a clear and authoritative picture of the Antarctic legal system as a whole The author demonstrates how these legal arrangements make an important contribution to international law generally notwithstanding the unique characteristics that set Antarctica apart

Multilateral Treaty-Making Vera Gowlland-Debbas, Hassiba Hadj-Sahraoui, Nobuo Hayashi, 2021-10-18 This book focuses on the impact of social change on the rules relating to the forms and procedures of treaty making but inevitably also comes to focus on the content of the norms themselves where as in human rights and the environment they have had an impact on the form and procedure of the treaty It is of great value to all practitioners academics and policy makers involved with or interested in the treaty making process

Smart Mixes for Transboundary Environmental Harm Judith van Erp, Michael Faure, André Nollkaemper, Niels Philipsen, 2019-03-28 Analyzes how combinations of instruments at different levels of government or smart mixes can effectively regulate transboundary environmental harm

Principles of International Environmental Law I Philippe Sands, 1995 This post UNCED account of the frameworks standards and implementation of the international environmental law is intended for undergraduates and academics in the fields of international law politics geography economics and environmental studies It can be used on its own as a reference or course text or in conjunction with its companion collections of documents

The International Legal Régime for the Protection of the Stratospheric Ozone Layer Osamu Yoshida, 2019-02-19 The first edition of Professor Yoshida's monograph The International Legal Régime for the Protection of

the Stratosphere Ozone Layer provided a renowned and comprehensive contemporary study of the international ozone regime. In the second revised edition the author analyses important developments in the ozone treaty regime. *Arthur H. Westing*

Arthur H. Westing, 2012-08-20 Since the 1960s the environment has become an issue of increasing public concern in North America and elsewhere. Triggered by the Second Indochina War/Vietnam Conflict of 1961-1975 and further encouraged by the International Conference on the Human Environment held in Stockholm in 1972, the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences. And in the late 1980s this led additionally to a focus and debate on environmental security. Arthur Westing, a forest ecologist, was a major pioneer contributing and framing both of those debates conceptually, theoretically and empirically, starting with *Harvest of Death: Chemical Warfare in Vietnam and Cambodia* (1972), co-authored with wildlife biologist E. W. Pfeiffer and others. As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes (SIPRI and PRIO) and as a Professor of Ecology at Windham and Hampshire Colleges, Westing authored and edited books on *Ecological Consequences of the Second Indochina War* (1976), *Weapons of Mass Destruction and the Environment* (1977), *Warfare in a Fragile World: Military Impact on the Human Environment* (1980), *Herbicides in War: The Long-term Ecological and Human Consequences* (1984), *Environmental Warfare: A Technical, Legal and Policy Appraisal* (1984), *Explosive Remnants of War: Mitigating the Environmental Effects* (1985), *Global Resources and International Conflict: Environmental Factors in Strategic Policy and Action* (1986), *Cultural Norms: War and the Environment* (1988), *Comprehensive Security for the Baltic: An Environmental Approach* (1989) and *Environmental Hazards of War: Releasing Dangerous Forces in an Industrialized World* (1990), as well as authoring numerous UN reports, book chapters and journal articles. This volume combines six of his pioneering contributions on the environmental consequences of warfare in Vietnam and in Kuwait, on the environmental impact of nuclear war, and on legal constraints and military guidelines for protecting the environment in wartime.

[Trade Measures in Multilateral Environmental Agreements](#) OECD, 2000-02-09 This report examines various cases to analyze the use of trade measures in environmental agreements and assembles a series of common issues and lessons learned.

The Rio Declaration on Environment and Development Jorge E. Viñuales, 2015-02-05 The international community has long grappled with the issue of safeguarding the environment and encouraging sustainable development, often with little result. The 1992 Rio Declaration on Environment and Development was an emphatic attempt to address this issue, setting down 27 key principles for the international community to follow. These principles define the rights of people to sustainable development and the responsibilities of states to safeguard the common environment. The Rio Declaration established that long-term economic progress required a connection to environmental protection. It was designed as an authoritative and comprehensive statement of the principles of sustainable development, law, an instrument to take stock of the past international and domestic practice, a guide for the design of new multilateral environmental regimes, and as a reference for litigation. This commentary provides an authoritative and comprehensive overview of the principles of the

Declaration written by over thirty inter disciplinary contributors including both leading practitioners and academics Each principle is analysed in light of its origins and rationale The book investigates each principle s travaux pr paratoires setting out the main points of controversy and the position of different countries or groups It analyses the scope and dimensions of each principle providing an in depth understanding of its legal effects including whether it can be relied before a domestic or international court It also assesses the impact of the principles on subsequent soft law and treaty development as well as domestic and international jurisprudence The authors demonstrate the ways in which the principles interact with each other and finally provide a detailed analysis of the shortcomings and future potential of each principle This book will be of vital importance to practitioners scholars and students of international environmental law and sustainable development

Economic and Legal Aspects of International Environmental Agreements Johannes Heister,1995 The Oxford Handbook of International Organizations Jacob Katz Cogan,Ian Hurd,Ian Johnstone,2016-11-24 Virtually every important question of public policy today involves an international organization From trade to intellectual property to health policy and beyond governments interact with international organizations in almost everything they do Increasingly individual citizens are directly affected by the work of international organizations Aimed at academics students practitioners and lawyers this book gives a comprehensive overview of the world of international organizations today It emphasizes both the practical aspects of their organization and operation and the conceptual issues that arise at the junctures between nation states and international authority and between law and politics While the focus is on inter governmental organizations the book also encompasses non governmental organizations and public policy networks With essays by the leading scholars and practitioners the book first considers the main international organizations and the kinds of problems they address This includes chapters on the organizations that relate to trade humanitarian aid peace operations and more as well as chapters on the history of international organizations The book then looks at the constituent parts and internal functioning of international organizations This addresses the internal management of the organization and includes chapters on the distribution of decision making power within the organizations the structure of their assemblies the role of Secretaries General and other heads budgets and finance and other elements of complex bureaucracies at the international level This book is essential reading for scholars practitioners and students alike The Environment and International Relations Mark Imber,John Vogler,2005-08-12 Environmental issues and questions of global change are now firmly established on the international political agenda This book provides a wide ranging survey of the current treatment of environmental issues in international relations This book begins by looking at the relevance of the different theoretical approaches current in international relations to the study of the environment It analyzes a wide range of approaches from the debate between neo realism and liberal institutionalism to the significant connections between gender and global environmental change The book goes on to consider a range of key international processes discussing the monitoring and implementation of environmental

agreements the place of ideology in negotiations and the role of international organisations *Forests in International Law* Anja Eikermann, 2015-02-05 This book investigates the potential need for an international convention on forests and establishes a multifunctional concept of forests as a cornerstone for international forest regulation Accordingly it examines a variety of international instruments pertaining directly or indirectly to forests and explores their entangled fragmented nature While contending that the lack of consistency in international law impedes the development of a stand alone international forest convention at the same time it argues that the lessons learned from fragmentation as well as from the history of forest discourse on the international level open up new options for the regulation of forests in international law based on new concepts of coordination and cooperation Environmental Law and Governance for the Anthropocene Louis Kotzé, 2017-06-15 The era of eco crises signified by the Anthropocene trope is marked by rapidly intensifying levels of complexity and unevenness which collectively present unique regulatory challenges to environmental law and governance This volume sets out to address the currently under theorised legal and consequent governance challenges presented by the emergence of the Anthropocene as a possible new geological epoch While the epoch has yet to be formally confirmed the trope and discourse of the Anthropocene undoubtedly already confront law and governance scholars with a unique challenge concerning the need to question and ultimately re imagine environmental law and governance interventions in the light of a new socio ecological situation the signs of which are increasingly apparent and urgent This volume does not aspire to offer a univocal response to Anthropocene exigencies and phenomena Any such attempt is in any case unlikely to do justice to the multiple implications and characteristics of Anthropocene forebodings What it does is to invite an unrivalled group of leading law and governance scholars to reflect upon the Anthropocene and the implications of its discursive formation in an attempt to trace some initial often radical future facing and imaginative implications for environmental law and governance
