Effects Of Early Experience Proceedings Of The Miami Symposium On The Prediction Of Behavior 1968:

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 **Behavioral Effects of Energy and Protein Deficits** ,1979 *Proceedings of the . . . Invitational Conference on Testing Problems* ,1971 The Development and Meaning of Psychological Distance Rodney R. Cocking,K. Ann Renninger,Ann Renninger,2013-06-17 One of the paradoxes in developmental theory is the child s simultaneous intrapsychic and interpsychic development While the child is growing in mental capacity and struggling to define self behaviors are also being learned whose function is to integrate self into a social network which often means that egocentric behaviors are in conflict with sociocentric ones This theory draws upon processes that promote both individual and social growth into a unified theory of development A construct pertinent to almost all dimensions of psychological research psychological distance is conceptualized as either the distance between what the learner understands and what still has to be understood intrapsychic or ways in which others adjust information for the learner in order to be fully comprehended interpsychic Psychological distance appears to serve both organizing and explanatory functions across seemingly diverse sets of theoretical and research questions such as differentiation of self in personality development conceptual representation in cognitive development dialogue in the development of communication skills information processing in cognitive science regulatory mechanisms in the growth of control processes and concept formation in cross over areas of cognition learning and thinking skills This volume is based on papers presented as part of the Invitational Conference honoring Irving E Sigel Distinguished Research Scientist at Educational Testing Service In each of the chapters different models are utilized to account for the construct of psychological distance and as such to suggest extensions of Sigel s seminal work in this area Together these contributions form the basis of a discussion of psychological distance as a developmental construct a construct which permits serious consideration of individual differences as a function of both the process and the product of cognition and ecology **Proceedings** ,1969 Development of Mental Representation Irving E. Sigel,2013-06-17 There is a general and extensive literature in the development of representational thought and symbolic processes because of its centrality in human evolution However the umbrella of science and its method does not necessarily lead to a coherent conceptual model or agreements among scholars These basic differences among various disciplines have led to the creation of new and exciting realms of research This book considers how representational or symbolic thought develops for children s use in a wide array of these circumstances **The Oxford Handbook of the Development of Imagination** Marjorie Taylor,2013-04-02 Children are widely celebrated for their imaginations but developmental research on this topic has often been fragmented or narrowly focused on fantasy However there is growing appreciation for the role that imagination plays in cognitive and emotional development as well as its link with children s understanding of the real world With their imaginations children mentally transcend time place and or circumstance to think about what might have

been plan and anticipate the future create fictional relationships and worlds and consider alternatives to the actual experiences of their lives The Oxford Handbook of the Development of Imagination provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought The topics covered include fantasy reality distinctions pretend play magical thinking narrative anthropomorphism counterfactual reasoning mental time travel creativity paracosms imaginary companions imagination in non human animals the evolution of imagination autism dissociation and the capacity to derive real life resilience from imaginative experiences Many of the chapters include discussions of the educational clinical and legal implications of the research findings and special attention is given to suggestions for future research

Methods of Family Research Irving E. Sigel, Gene Brody, 2014-02-24 These companion volumes provide a behind the scenes look into the personal experiences of researchers in an effort to eliminate the lack of communication surrounding family research methodology They show how the researchers achieved their results and why they chose particular methodologies over others These volumes present more than just findings they present the real experiences of the authors in their own styles and personalities exposing the problems mistakes and concerns they experienced during their research projects Volume I presents the experiences of researchers into typical normative populations Volume II describes work with clinical atypical populations
