Effects Of Pollution On Fish:

Effects of Pollution on Fish Andrew J. Lawrence, Krystal L. Hemingway, 2008-04-15 The impact of pollution on fisheries and the potential health implications of eating contaminated fish are areas of considerable concern for the fishing and aquaculture communities government bodies and the general public Pollution as well as over fishing may well be contributory to recent serious declines in global fish stocks *Effects of Pollution on Fish* brings together the work of many international experts each of whom have examined the literature on marine and freshwater fish and where appropriate invertebrates to produce comprehensive chapters covering all major aspects of the impacts of pollution on fish and fisheries The book describes these impacts in detail from the molecular and sub cellular level through organism to population and community levels and subsequently to socio economic implications The editors of this thorough and timely book have drawn together contributions encompassing molecular genetics biochemistry physiology population and community biology and fishery economics As such this important book will be of great use and interest to students and professionals studying and teaching in all those subject areas Fish biologists environmental scientists and ecotoxicologists marine and freshwater ecologists fisheries managers aquaculture personnel and fish farmers as well as fish veterinarians will all find much of great value within this book Libraries in universities and research establishments concerned with these areas should all have copies of this book on their shelves

Sublethal and Chronic Effects of Pollutants on Freshwater Fish Rudolf Müller, Richard Lloyd, 1994-01-01 Recent years have seen much greater emphasis placed on the monitoring and measurement of sublethal aspects of pollution on fish Tests and subsequent measurements have been made over the whole range of biological organisation from the subcellular to changes at community structure level Studies at the lower levels attract considerable scientific interest but in many cases it is still difficult to interpret the results of tests in terms of predicted harmful effects on individual fish Conversely it has been difficult to attribute the effects measured at higher levels to specific pollutants This major new volume of immense scientific importance to fisheries managers fish biologists ecotoxicologists and those working in the area of fisheries and pollution contains thirty two papers presented at the Symposium hosted by the European Inland Fisheries Advisory Commission Contributions come from an international team of distinguished experts and together the papers represent a detailed overview of work which is currently being undertaken in this area Unlike many Symposia which simply report proceedings this volume integrates the results of various areas of research and offers solid recommendations for future research and control
