Understanding the Income and Efficiency Gap in Latin America and the Caribbean Jorge Thompson Araujo, Ekaterina Vostroknutova, Konstantin M. Wacker, Mateo Clavijo, 2016-03-28 The countries of the Latin America and Caribbean region LAC like other emerging economies have benefited from a decade of remarkable growth and some income per capita convergence towards the United States and other industrialized countries However even nearly ten years of solid growth in the first decade of the 21st century could not guarantee that LAC would move on to a sustained long term income convergence path In fact despite this recent progress LAC still faces a significant per capita income gap with the developed world The papers in this volume contribute to the ongoing debate on the reasons for this persistent income gap and the potential drivers of convergence and propose some broad avenues for reform This volume presents new macro sectoral and

micro level evidence that i differences in total factor productivity TFP or efficiency in using the production factors such as physical and human capital explain a large part of LAC s persistent income gap and ii resource misallocation is the main factor behind LAC s large efficiency gap At the same time the findings of this volume indicate there is significant room for further economic growth gains from technology adoption and innovation more broadly In fact the quality of the available technology in LAC is low and there is very little innovation Although firms can use innovation to reach productivity at the global productivity frontier weak institutions reduce incentives to innovate This volume also proposes that the main priorities for improving resource allocation and the incentives to innovate include i enhancing market competition in key network industries transport financial telecommunications logistics communication and distribution services ii increasing labor market flexibility including skill mismatches and social barriers iii removing informational frictions including complex tax regimes and credit rationing iv strengthening property rights and v improving the rule of law

Energy Management and Conservation Handbook Frank Kreith, D. industrial facilities After developing the basics of HVAC control the book explores operational needs for successfully maintained operations It describes the essentials of control systems for heating ventilating and air conditioning of buildings designed for energy conserving operation The book also defines demand side management covers its role in integrated resource planning and delineates the main elements of its programs The book demonstrates these concepts with case studies of successful demand side management programs These features and more provide the tools necessary to improve energy management leading to higher energy efficiencies Strategic Thinking Irene M. Duhaime,Larry Stimpert,Julie Chesley,2012-03-22 There are many strategy books available in the marketplace for today s student or business professional most of them view strategy from the 10 000 foot level while Strategic Thinking looks at this important business topic through a different lens Written from the perspective of a manager this book builds on theories of managerial and organizational cognition that have had a powerful influence on many business fields over the last two decades As other books on business policy and strategy cover a broad range of topics models frameworks and theories the unique feature of this book is that it covers all this but also focuses on how managers of business firms understand their business environments assess and marshal their firms resources and strive for advantage in the competitive marketplace It examines the economic structural and managerial explanations for firm performance Offering professors and business people who are intrigued by the ideas introduced in Peter Senge s books ways to apply those ideas and principles in the classroom and in the companies in which they work the book puts managers front and center
