Egalitarianism And The Generation Of Inequality:

Egalitarianism and the Generation of Inequality Henry Phelps Brown, 1988-11-03 The belief that existing distributions of income and wealth are unjust has come to be widely held and has prompted the inclusion of egalitarian measures in many political programmes This work uses the methods of reasoned history and comparative statistics to arrive at an assessment of egalitarianism After reviewing the outlooks of the ancient and medieval worlds it traces the rise of egalitarianism from the Renaissance and Reformation onwards A complementary approach is provided by a wide survey of actual distributions of income and wealth what is known of them in the past what form they take in contemporary societies and the economic processes that generate them These comprehensive studies lead to an inquiry into the authority of equality as a principle of social philosophy and the practicability of egalitarian policy

The Politicians and the Egalitarians: The Hidden History of American Politics Sean Wilentz, 2016-05-17 One of our most eminent historians reminds us of the commanding role party politics has played in America's enduring struggle against economic inequality There are two keys to unlocking the secrets of American politics and American political history So begins *The Politicians and the Egalitarians* Princeton historian Sean Wilentz's bold new work of history First America is built on an egalitarian tradition At the nation's founding Americans believed that extremes of wealth and want would destroy their revolutionary experiment in republican government Ever since that idea has shaped national political conflict and scored major egalitarian victories from the Civil War and Progressive eras to the New Deal and the Great Society along the way Second partisanship is a permanent fixture in America and America is the better for it Every major egalitarian victory in United States history has resulted neither from abandonment of partisan politics nor from social movement protests but from a convergence of protest and politics and then sharp struggles led by principled and effective party politicians There is little to be gained from the dream of a post partisan world With these two insights Sean Wilentz offers a crystal clear portrait of American history told through politicians and egalitarians including Thomas Paine Abraham Lincoln and W E B Du Bois a portrait that runs counter to current political and historical thinking As he did with his acclaimed *The Rise of American Democracy* Wilentz once again completely transforms our understanding of this nation's political and moral character

The Nazarbayev Generation Marlene Laruelle, 2019-08-30 This social and cultural analysis provides a new understanding of Kazakhstan's younger generations that emerged during the rule of Nursultan Nazarbayev who has been presiding over Kazakhstan for the thirty years since the collapse of the Soviet Union. Half of Kazakhstan's population was born after he took power and have no direct memory of the Soviet regime. Since the early 2000s they have lived in a world of political stability and relative material affluence and have developed a strong consumerist culture. Even with growing government restrictions on media, religion, and formal public expression, they have been raised in a comparatively free country. This book offers the first collective study of the Nazarbayev Generation, illuminating the diversity of the country's younger generations and the transformations of social and cultural norms that have taken place over the course of three decades. The contributors to this collection move away from state-centric, top-down perspectives in favor of grassroots realities and bottom-up dynamics in order to better integrate sociological data.

In this work, Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what

our uniquely human capacities permit us to build produce and maintain and is appropriately respected for the capacity to hold such a place to begin with Risse begins by investigating the role of political philosophers and exploring how to think about the global context where philosophical inquiry occurs Next he offers a quasi historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now Finally he investigates the core terms of this view including stringency moral value ground and duties of justice

Created Equal Joshua Berman, 2011-08-12 In Created Equal Joshua Berman engages the text of the Hebrew Bible from a novel perspective considering it as a document of social and political thought He proposes that the Pentateuch

can be read as the earliest prescription on record for the establishment of an egalitarian polity What emerges is the blueprint for a society that would stand in stark contrast to the surrounding cultures of the ancient Near East Egypt Mesopotamia Ugarit and the Hittite Empire in which the hierarchical structure of the polity was centered on the figure of the king and his retinue Berman shows that an egalitarian ideal is articulated in comprehensive fashion in the Pentateuch and is expressed in its theology politics economics use of technologies of communication and in its narrative literature Throughout he invokes parallels from the modern period as heuristic devices to illuminate ancient developments Thus for example the constitutional principles in the Book of Deuteronomy are examined in the light of those espoused by Montesquieu and the rise of the novel in 18th century England serves to illuminate the advent of new modes of storytelling in biblical narrative

What We Owe to Future People Elizabeth Finneron-Burns, 2024 What do we owe future people Intergenerational ethics is of great philosophical and practical importance given human beings ability to affect not only the quality of life of future people but also how many of them there will be if any at all This book develops a distinctly contractualist answer to this question we need to justify our actions to them on grounds they could not reasonably reject The book explores what future people could or could not reasonably reject in terms of intergenerational resource distribution individual procreative decisions optimal population size and risk imposition
