Implicatures in Discourse Sarah E. Blackwell,2003

Implicatures in Discourse examines Spanish conversations and oral narratives in order to seek support for a pragmatic theory of anaphora Blackwell argues that the use of anaphoric expressions may be considered conversational implicatures that give rise to inferences of coreference and non coreference Her analysis shows how speakers abide by Levinson s neo Gricean principles of Quantity Informativeness and Manner but that grammatical semantic cognitive and pragmatic constraints interact with the neo Gricean principles influencing anaphora use and interpretation The study also reveals how mutual knowledge including familiarity with Spanish social and cultural norms enables interlocutors to use and comprehend minimal referring expressions which cultural outsiders may not be able to interpret While drawing on earlier work on anaphora and reference this book offers a fresh look at discourse anaphora and sheds light on the ways in which speakers felicitously use and interpret anaphoric expressions in a variety of communicative contexts

Demonstratives in Interaction Ritva Laury,1997-07-03 This book concerns one of the paradigm examples of grammaticalization the development of a definite article from a demonstrative determiner Although standard written Finnish has no articles the demonstrative se is currently emerging as a definite article in spoken Finnish This book describes and explains the developing use of se based on a database consisting of spoken narratives from three different periods spanning the last one hundred years The author proposes that the development from demonstrative to article has its roots in the way that speakers ordinarily use demonstratives in conversation and provides an analysis of the use of se and the two other Finnish demonstratives t m and

tuo in a corpus of multi party conversations showing that speakers of Finnish use demonstratives to focus attention on important referents and to express and negotiate access to them in the interactive context of ongoing talk and not primarily to talk about how near or far referents are The development of se into a general marker of identifiability is shown to be connected with both the focusing function of demonstratives as well as its use for referents which the speaker considers accessible to the addressee *Hearings held January 31- May 15, 1974* United States.
