Eight Little Piggies Reflections In Natu:

Eight Little Piggies: Reflections in Natural History Stephen Jay Gould, 2010-11-29 There is no scientist today whose books I look forward to reading with greater anticipation of enjoyment and enlightenment than Stephen Jay Gould. Martin Gardner, Among scientists who write, no one illuminates as well as Stephen Jay Gould. The wonderful workings of the natural world. Now in a new volume of collected essays, his sixth since *Ever Since Darwin*, Gould speaks of the importance of unbroken connections within our own lives and to our ancestral generations. Along the way he opens to us the mysteries of fish tails, frog calls, and other matters, and shows once and for all why we must take notice when a seemingly insignificant creature is threatened, like the land snail *Partula* from Moorea, whose extinction he movingly relates.

On Solid Ground David Goldsmith, 2023-01-10 *On Solid Ground* illustrates what geologists know about the earth by telling the stories of the people who made major geological discoveries. It also chronicles the doubters and nay sayers who have worked so hard to undermine our understanding of the earth. Each chapter of this book contains three things: the human story of a geologic controversy, an explanation of why geologists are so sure about the right answer to that controversy, and a short discussion of the logical fallacies being used by those still unwilling to accept geologic expertise.

An Urchin in the Storm: Essays about Books and Ideas Stephen Jay Gould, 2010-11-29 What pleasure to see the dishonest, the inept, and the misguided deftly given their due while praise is lavished on the deserving for reasons well and truly stated. Kirkus Reviews. Ranging as far as the fox and as deep as the hedgehog, the urchin of his title, Stephen Jay Gould expands on geology, biological determinism, cardboard Darwinism, and evolutionary theory in this sparkling collection.

Evolving Animals Wallace Arthur, 2014-08-07 What do we know about animal evolution in the early twenty-first century? How much more do we know today than Darwin did? What are the most exciting discoveries that have been made in the last few decades? Covering all the main animal groups from jellyfish to mammals, this book considers all of these questions and more. Its 30 short chapters, each written in a conversational, nontechnical style and accompanied by numerous original illustrations, deal equally with the pattern and the process of evolution, with both evolutionary trees and evolutionary mechanisms. They cover diverse evolutionary themes, including the animal toolkit, natural selection, embryos and larvae, animal consciousness, fossils, human evolution, and even the possibility of animal life existing elsewhere than on Earth. This unique text will make an excellent introduction for undergraduates and others with an interest in the subject.

Stephen Jay Gould and the Politics of Evolution David F. Prindle, **Mapping Reality** Jane Azevedo, 1997-01-01 Using the insights of evolutionary epistemology, the author develops a new naturalist realist methodology of science and applies it to the conceptual, practical, and ethical problems of the social sciences.

Bugs in Danger Mark Kurlansky, 2019-11-12 By now you've probably heard that bees are disappearing, but they aren't the only species at risk. Populations of fireflies, butterflies, and ladybugs have all been declining in recent years too. This middle-grade nonfiction explains the growth, spread, and recent declines of each of these four types of insects. Exploring human causes like

the Baltimore electric company that collected fireflies to attempt to harness their phosphorescent lighting source to natural occurrences like the mysterious colony collapse disorder that plagues bee populations master nonfiction storyteller Mark Kurlansky shows just how much bugs matter to our world

Post-Traumatic Public Theology Stephanie N. Arel, Shelly Rambo, 2016-11-02 This book imagines new modes of religious response to trauma moving beyond simple answers to the why of human suffering toward discussions of profound expressions of faith in the aftermath of trauma Engaging current realities such as war race and climate change chapters feature specific locations from which theology is done and draw on the resources of Christian faith in order to respond This volume recognizes religious leaders as first responders to trauma and offers theological reflections that can stand up in the current realities of violence and its aftermath The writings provide models for how to integrate the language of faith with the literature of trauma

Parchment, Printing, and Hypermedia Ronald Deibert, 2000-01-15 Interweaving media theory and historical analysis this book explores the effect new digital telecommunication technologies which Deibert calls hypermedia will have on the distribution of political power in the next century Deibert tracks the transf

A History of Endometriosis Ronald Batt, 2011-06-15 The early history of endometriosis is interwoven with the history of adenomyosis since it was not until the mid nineteen twenties that the two conditions were finally separated A History of Endometriosis provides a detailed reconstruction of the progress made in identifying describing and treating the condition we call today endometriosis

God, the Devil, and Darwin Niall Shanks, 2007-03-15 In recent years a controversial new theory of the origins of biological complexity has been fomenting bitter debates in education and science policy Intelligent Design theory ID proposes an alternative to accepted accounts of evolutionary theory that life is so complex and that the universe is so fine tuned for the appearance of life that the only plausible explanation is the existence of an intelligent designer For many ID theorists the designer is taken to be the God of Christianity This book is an accessible introduction to and critique of this controversial new movement After looking at the historical roots of ID philosophy of science professor Shanks takes a hard look at its intellectual underpinnings and shows how arguments for ID lack cohesion rest on errors and unfounded suppositions and generally are grossly inferior to evolutionary explanations From publisher description

Sex and Death Kim Sterelny, Paul E. Griffiths, 2024-05-31 Is the history of life a series of accidents or a drama scripted by selfish genes Is there an essential human nature determined at birth or in a distant evolutionary past What should we conserve species ecosystems or something else Informed answers to questions like these critical to our understanding of ourselves and the world around us require both a knowledge of biology and a philosophical framework within which to make sense of its findings In this accessible introduction to philosophy of biology Kim Sterelny and Paul E Griffiths present both the science and the philosophical context necessary for a critical understanding of the most exciting debates shaping biology today The authors both of whom have published extensively in this field describe the range of competing views including their own on these fascinating topics With its clear explanations of both biological and philosophical concepts Sex and Death

will appeal not only to undergraduates but also to the many general readers eager to think critically about the science of life

Being the Body of Christ in the Age of Management Lyndon Shakespeare, 2016-08-26 The church needs effective leaders We must be more missional Better organization is required Such sentiments are commonplace among Christians concerned with the health and sustainability of their local church as well as the church universal Over the past thirty years the desire for more efficiently run effectively led and organizationally sound churches has contributed to an approach to thinking about the church in terms uncritically assumed from the business and management sector This has given rise to treating the church as if it were just another social body in need of better organization The question is what happens when we apply the logic of management techniques to an organization that identifies as the body of Christ Drawing on organizational theory theological anthropology and sacramental theology this book navigates a path for Christians that avoids reducing the church to just another organization while providing a vision for the church as the social body where all are invited to connect and be made members of Christ and each other Such a vision provides an alternative to the social categorization that would define the church by its organizational character rather than its eschatological destiny

What's the Use? Sara Ahmed, 2019-10-25 In *What's the Use* Sara Ahmed continues the work she began in *The Promise of Happiness* and *Willful Subjects* by taking up a single word in this case use and following it around She shows how use became associated with life and strength in nineteenth century biological and social thought and considers how utilitarianism offered a set of educational techniques for shaping individuals by directing them toward useful ends Ahmed also explores how spaces become restricted to some uses and users with specific reference to universities She notes however the potential for queer use how things can be used in ways that were not intended or by those for whom they were not intended Ahmed posits queer use as a way of reanimating the project of diversity work as the ordinary and painstaking task of opening up institutions to those who have historically been excluded

Thinking about the Earth David Roger Oldroyd, 1996 *Thinking about the Earth* is a history of the geological tradition of Western science David Oldroyd traverses such topics as mechanical and historicist views of the earth map work chemical analyses of rocks and minerals geomorphology experimental petrology seismology theories of mountain building and geochemistry

Species of Origins Karl W. Giberson, Donald A. Yerxa, 2002-10-09 In *Species of Origins* Karl W. Giberson and Donald A. Yerxa examine America's controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo-Christian religions

Adam's Ancestors David N. Livingstone, 2011-03-15 Winner of the Selection for Professional Reading List of the U.S. Marine Corps Although the idea that all human beings are descended from Adam is a long standing conviction in the West another version of this narrative exists human beings inhabited the Earth before or alongside Adam and their descendants still occupy the planet In this engaging

and provocative work David N Livingstone traces the history of the idea of non adamic humanity and the debates surrounding it from the Middle Ages to the present day From a multidisciplinary perspective Livingstone examines how this alternative idea has been used for cultural religious and political purposes He reveals how what began as biblical criticism became a theological apologetic to reconcile religion with science evolution in particular and was later used to support arguments for white supremacy and segregation From heresy to orthodoxy from radicalism to conservatism from humanitarianism to racism Adam s Ancestors tells an intriguing tale of twists and turns in the cultural politics surrounding the age old question Where did we come from

Human Prehistory in Fiction Charles De Paolo,2015-09-11 What was the world like for people thousands of years ago How can we know Through fiction This is a work of literary criticism and more It begins with a discussion of the problem of authenticity and then considers twelve pieces of fiction that depict human prehistory H G Wells The Island of Doctor Moreau Pierre Boulle s The Planet of the Apes Jules Verne s The Village in the Treetops Edgar Rice Burroughs The Land That Time Forgot the struggle for legitimacy in Wells The Grisly Folk the Tasmanian analogue in Lester Del Rey s The Day Is Done William Golding s The Inheritors the promise of humanity in Arthur C Clarke s 2001 A Space Odyssey the theme of a god among the heathen in Wells The Lord of the Dynamos and other works Jean Auel s The Clan of the Cave Bear J H Rosny Aine s Quest for Fire and Wells The Time Machine An Invention A final chapter considers the paleoanthropologist as literary critic

on the shortlist for the first British Academy Book Prize awarded in December 2001 *Evolution and the Common Law* Allan C. Hutchinson, 2005-04-04 This book offers a radical challenge to accounts of the common law's development. Contrary to received jurisprudential wisdom it maintains there is no grand theory which will explain satisfactorily the dynamic interactions of change and stability in the common law's history. Offering original readings of Charles Darwin's and Hans Georg Gadamer's works the book shows that law is a rhetorical activity that can only be properly appreciated in its historical and political context: tradition and transformation are locked in a mutually reinforcing but thoroughly contingent embrace. In contrast to the dewy-eyed offerings of much contemporary work it demonstrates that like life law is an organic process: i.e. events are the products of functional and localized causes rather than a miraculous one; i.e. events are the result of some grand plan or intervention. In short common law is a perpetual work in progress: evanescent, dynamic, messy, productive, tantalising and bottom up.
