## **Good Intentions Pledges Of Aid For Postconflict Recovery:**

**Good Intentions** Shepard Forman, Stewart Patrick, 2023 This comparative study assesses the causes and consequences of failures to fulfill pledges of aid to postconflict societies In each of six case studies the coauthors drawn from both donor states and recipient countries evaluate multilateral efforts to support sustainable recovery and peacebuilding in societies emerging from protracted violence They first establish the timing composition and objectives of aid pledged by the donor community They then analyze the conditions that donors placed on their assistance the mechanisms they created to coordinate it and donor performance in delivering it Next they evaluate the recipient s ability to absorb external assistance and the impact that this aid has had for reconstruction and peacebuilding goals Finally they assess the causes consequences and lessons of any gaps between pledges and disbursements What explains shortfalls in aid disbursement And what do these recent experiences suggest for improving the multilateral design mobilization and coordination of assistance to postconflict societies Good intentions notwithstanding inadequate preparation poor coordination and lack of perseverance can threaten the recovery of vulnerable polities whose collapse would endanger regional peace and security **Good Intentions**

*You, the People* Simon Chesterman, 2005 The governance of post conflict territories embodies a central contradiction how does one help a population prepare for democratic governance and the rule of law by imposing a form of benevolent autocracy Transitional administrations represent the most complex operations attempted by the United Nations The operations in East Timor and Kosovo are commonly seen as unique in the history of the UN perhaps never to be repeated But they may also be seen as the latest in a series of operations that have involved the United Nations in state building activities where it has attempted to develop the institutions of government by assuming some or all of those sovereign powers on a temporary basis The circumstances that have demanded such interventions certainly will be repeated Seen in the context of earlier UN operations such as those in Namibia Cambodia and Eastern Slavonia the view that these exceptional circumstances may not recur is somewhat disingenuous Moreover the need for such policy research has been brought into sharp focus by the weighty but ambiguous role assigned to the UN in Afghanistan and the possibility of a comparable role in Iraq This book fills that gap Aimed at policy makers diplomats and a wide academic audience including international relations political science international law and war studies the book provides a concise history of UN state building operations and a treatment of the five key issues confronting such an operation on the ground peace and security the role of the UN as government judicial reconstruction economic reconstruction and exit strategies

*Promoting Democracy* Manal A. Jamal, 2019-08-20 How Western donor assistance can both help and undermine democracy in different parts of the world Democracy promotion is a central pillar of the foreign policy of many states but the results are often disappointing In *Promoting Democracy* Manal A Jamal examines why these efforts succeed in some countries but fail in others A former journalist and researcher in the Palestinian territories she offers an up close perspective of the ways in which Western donor funding has on one hand undermined political participation in cases such as the Palestinian territories and on the other hand succeeded in bolstering political engagement in cases such as El Salvador Based on five fieldwork trips and over 150 interviews with grassroots activists political leaders and directors and program officers in donor agencies and NGOs Jamal brings into focus an often overlooked perspective the experiences of those directly affected by this assistance *Promoting Democracy* makes an important and timely argument about how political settlements ultimately shape

democracy promotion efforts and what political choices Western state sponsored donors can make to maximize successful outcomes in different contexts across the world

**Engineering Peace** Garland H. Williams, 2005 In practically all the peacekeeping operations of the 1990s a postconflict reconstruction gap of almost one year separates the end of military peacekeepers mission of halting mass violence from the start of removing mines as well as rebuilding and repairing the host country's physical infrastructure roads and bridges public utilities and buildings In this timely work Colonel Garland Williams analyzes the postconflict reconstruction gap in three case studies Bosnia Kosovo and Afghanistan and shows how military engineering brigades accompanying peacekeeping contingents can be put to use immediately after the conflict ends to restore vital infrastructure and social institutions In the book's concluding chapter Williams proposes changes in U S national security decision making to integrate military engineering brigades into postconflict reconstruction thus making U S military officials less wary of mission creep and nation building

*International Assistance to the Palestinians After Oslo* Anne Le More, 2008-03-31 Based on original academic research and first hand evidence this book explores the interface between politics and international assistance within the context of the Israeli Palestinian conflict and peace process after 1993 to the present day

**State Formation in Palestine** Inge Amundsen, George Giacaman, Mushtaq Husain Khan, 2004-07-08 This book examines key questions and challenges the widely prevalent view that the Palestinian Authority collapsed because of its internal governance failures its lack of commitment to democracy and corruption It argues that the analytical framework of good governance is not appropriate for assessing state performance in developing countries and that it is especially inappropriate in conflict and post conflict situations Instead an alternative framework is proposed for assessing state performance in a context of economic and social transformation This is then applied in detail to different aspects of state formation in Palestine showing that the institutional architecture set up by the Oslo agreements was responsible for many of the serious failures

Conflict and Development Andrew J. Williams, Alasdair Gordon-Gibson, 2024-09-26 Fully revised and updated in its third edition this timely book brings together the study of conflict and war and the problems surrounding the economic development of developing societies that are most prone to experiencing problems in moving on after war The book does so by reflecting on the issues surrounding war as it unfolds and after it has in principle ended within the context of the history present day problems and future prospects The book aims to highlight the possibilities successes and failures of past and present policies that bring development to countries and peoples that want to be more involved in deciding their own futures after conflict and war and often find themselves subject to what can be seen as arbitrary and even alien ways of thinking and acting by institutions in which they theoretically have membership and agency but often do not in practice The case studies have been fully updated to reflect changes and developments since the second edition of this text and there are questions at the end of each chapter to promote reflection This new edition presents a deeper dive into the history of conflict and the emergence of new theories and policy guidance about present and future options in the fields of conflict and

development Accessible and engaging this textbook is a pivotal resource for a nexus of subjects related to the often separated fields of conflict and development studies as well as practitioners in this area Approaches to Peacebuilding H. Cooper, Jorge Heine, Ramesh Thakur, 2013-03-28 At a time when diplomatic practices and the demands imposed on diplomats are changing quite radically and many foreign ministries feel they are being left behind there is a need to understand the various forces that are affecting the profession Diplomacy remains a salient activity in today's world in which the basic authoritative actor is still the state At the same time in some respects the practice of diplomacy is undergoing significant even radical changes to the context tools actors and domain of the trade These changes spring from the changing nature of the state the changing nature of the world order and the interplay between them One way of describing this is to say that we are seeing increased interaction between two forms of diplomacy club diplomacy and network diplomacy The former is based on a small number of players a highly hierarchical structure based largely on written communication and on low transparency the latter is based on a much larger number of players particularly of civil society a flatter structure a more significant oral component and greater transparency The Oxford Handbook of Modern Diplomacy is an authoritative reference tool for those studying and practicing modern diplomacy It provides an up to date compendium of the latest developments in the field Written by practitioners and scholars the Handbook describes the elements of constancy and continuity and the changes that are affecting diplomacy The Handbook goes further and gives insight to where the profession is headed in the future Co edited by three distinguished academics and former practitioners the Handbook provides comprehensive analysis and description of the state of diplomacy in the 21st Century and is an essential resource for diplomats practitioners and academics Elgar Handbook of Civil War and Fragile States Graham K. Brown, Arnim Langer, 2012-01-01 The Elgar Handbook of Civil War and Fragile States is an impressive volume Its distinguished contributors offer a rich menu of courses ranging from conflict and war to peacemaking transitional justice peacekeeping and powersharing Encyclopedic in its scope the volume encompasses many different approaches to stimulate and provoke the careful reader It serves up a feast for scholars and policymakers alike Donald L Horowitz Duke University US The Elgar Handbook of Civil War and Fragile States brings together contributions from a multidisciplinary group of internationally renowned scholars on such important issues as the causes of violent conflicts and state fragility the challenges of conflict resolution and mediation and the obstacles to post conflict reconstruction and durable peace building

While other companion volumes exist this detailed and comprehensive book brings together an unrivalled range of disciplinary perspectives including development economists quantitative and qualitative political scientists and sociologists Topical chapters include Post Conflict and State Fragility Ethnicity Human Security Poverty and Conflict Economic Dimensions of Civil War Climate Change and Armed Conflict Rebel Recruitment Education and Violent Conflict Obstacles to Peace Settlements and many others With detailed and comprehensive coverage this Handbook will appeal to postgraduate and undergraduate students policymakers researchers and academics in conflict and peace studies international relations international politics and security studies **Post-Conflict Rebuilding and International Law** Ray Murphy, 2017-03-02

This volume presents the research analysis of a range of scholars and experts on post conflict peacebuilding and international law from a variety of perspectives and missions The selected essays show that peacebuilding like the concept of peacekeeping is not specifically provided for in the UN Charter They also demonstrate that the record of peacebuilding like that of peacekeeping is varied and while both concepts are intrinsically linked neither lends itself to precise definition The essays consider the historical approaches to peacebuilding such as the role played by the UN in the Congo in the early 1960s and the work of the United States and its allies in rebuilding Germany and Japan in the aftermath of World War II Finally essays consider the major challenge for contemporary peacebuilding operations to make international administrations accountable and to ensure the involvement of the international community in helping rebuild communities and prevent the resurgence of violence Ending Civil Wars Stephen John Stedman, Donald S. conflict leader Rick Barton uses a mix of stories history and analysis for a transformative approach to foreign affairs and offers concrete and attainable solutions for the future Drawing on his lifetime of experience as a diplomat foreign policy expert and State Department advisor Rick Barton grapples with the fact that the U S is strategically positioned and morally obligated to defuse international conflicts but often inadvertently escalates conflicts instead Guided by the need to find solutions that will yield tangible results Barton does a deep analysis of our last several interventions and discusses why they failed and how they could have succeeded He outlines a few key directives in his foreign policy strategy remain transparent with the American public act as a catalyzing not colonizing force and engage local partners But above all else he insists that the U S must maintain a focus on people Since a country s greatest resource is often the ingenuity of its local citizens it is counterproductive to ignore them while planning an intervention By anchoring each chapter to a story from a specific conflict zone Barton is able to discuss opportunities pursued and missed areas for improvement and policy recommendations This balance between storytelling and concrete policy suggestions both humanizes distant stories of foreign crises and provides going forward solutions for desperate situations The book begins and ends in Syria the ultimate failure of our current approach to foreign policy and with devastating consequences *Beyond Reconstruction in Afghanistan* J. Montgomery, D. Rondinelli, 2004-04-23 The interaction of failed states terrorism and the need for nation building is at the top of the international agenda with particular focus on Afghanistan and Iraq This path breaking collection brings together top analysts to examine the goals and challenges facing efforts to reconstruct states that have collapsed into anarchy or have been defeated in war Drawing on lessons from 50 years of past experience with post conflict reconstruction and development around the world the authors provide historical context identify difficulties that can impede progress and recognize the realistic limitations of ambitions to create new states They assess ongoing development plans in a country devastated by more than a century of conflict Throughout particular attention is paid to the interaction of the goals of external and domestic actors highlighting the importance of understanding the internal social economic and political environment of the society receiving assistance *Historical Dictionary of the United Nations* Jacques Fomerand, 2017-12-29 At a time of profound transformations in international relations the second edition of Historical Dictionary of the United Nations maps out the continuing and deepening role and relevance of the United Nations in the maintenance of peace and the promotion of development and human rights Focusing on the past two decades developments this book contributes to a reasoned and fuller understanding of an organization which remains the cornerstone of a changing world fraught with challenges which simply cannot be addressed either unilaterally or bilaterally This second edition of Historical Dictionary of the United Nations contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 1 000 cross referenced entries on its basic organizations subsidiary bodies related specialized and other agencies and nongovernmental actors as well as outstanding figures in its history This book is an excellent resource for students researchers and anyone
