THE EVOLUTION OF PSYCHOLOGY Dr. Ankit Kumar, 2025-10-01 Forget everything you think you know about psychology This is not a polite history lesson This is the naked ruthless truth about how humanity lied

guessed manipulated and occasionally discovered fragments of reality in its desperate attempt to understand the mind For most of history psychology wasn't science it was myth Shamans blamed demons for madness Priests declared seizures a punishment from God Witches were burned for what we now call trauma This wasn't healing It was ignorance dressed as authority Then came philosophy the first cosmetic surgery for human confusion Plato spoke of souls Aristotle wrote about logic Eastern sages spoke of manas and suffering But speculation is not science These weren't experiments They were stories Elegant poetic inspiring but mostly wrong And modern psychology Don't worship it either Freud sexualized everything Jung mystified everything Skinner reduced humans to rats in boxes Cognitive psychologists declared the brain a computer Neuroscientists reduced joy to dopamine despair to serotonin Every generation of psychology has built myths first truths later And each myth shaped culture politics relationships and power This book rips apart that entire timeline Inside you'll see The Age of Illusions how shamans priests and witch doctors became the first psychologists Philosophers as Healers when Plato Aristotle Buddha and others turned speculation into doctrine Freud's Obsessions how one man sexualized the mind and shocked morality Jung and the Shadow mystical archetypes suppressed desires and collective myths Behaviourism how Pavlov Skinner and Watson reduced humans to machines of reward and punishment The Cognitive Revolution psychology borrows from computers and finally admits humans are irrational The Neuroscience Takeover fMRI scans neurotransmitters and how sadness became a chemical imbalance Positive Psychology the rise of happiness science and the cult of good vibes only Dark Psychology psychopathy cults dictators and the manipulation industry The Digital Age when algorithms became the new psychologists hijacking your brain daily The Future AI neurohacking and why psychology fears irrelevance But this book doesn't stop with history It also exposes the dirty hands of psychology Nazi eugenics and concentration camp experiments CIA's MKUltra mind control horrors Cambridge Analytica's manipulation of elections Psychology has healed millions yes But it has also enslaved billions If you want a comforting fairy tale about noble scientists discovering eternal truths close this book now If you want the raw uncomfortable reality that psychology is as much about power control and manipulation as it is about healing keep reading Because psychology is not evolution It is survival And until you see how deeply it has been used to program you you are still its prisoner
