The author focuses on specific areas such as Basic issues of leadership succession, demographic and generational roots of the succession crisis, patterns of succession management and their implications, successful succession practices from around the world. Dean is a former teacher, school principal and senior official in Ontario, Canada. **Managing to Change** Thomas Hatch, 2015-04-18

This book shows how school improvement efforts are often undermined by the changing conditions around schools as well as by some of the very policies and programs designed to help them make improvements. Hatch argues that schools cannot wait around for conditions to improve or policymakers to figure out how to provide the right support. Schools need to create the conditions for their own success. To help them accomplish that, the author describes a small set of key practices that schools can use to get resources, manage external demands and build their capacity to make and sustain improvements over time.

**Developing Successful Leadership** Brent Davies, Mark Brundrett, 2010-07-20 Research

has shown that school leadership is second only to classroom teaching in its effect on pupil learning. As the demands on management teams become ever more complex, this volume offers a fresh and expansive view on the challenges to be met in developing a leadership career. With contributions from some of the most accomplished commentators on school leadership and management from around the world, this book moves away from the simple 'how to' of becoming a principal, focusing instead on the wider issues of becoming a successful leader. The central aim has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools. In so doing, the text examines strategies for existing leaders developing their full capacity as well as enhancing the skills of those new to or aspiring to a leadership role. The chapters contributed by a carefully selected group of leading educationalists present insights on a number of central themes including developing new skill sets in leadership, the ethical and moral dimensions of leading an organisation, leadership for instructional and pedagogical success, developing leadership capacity and capability through strategic activity. Rather than taking a technical approach of how to undertake the managerial or administrative tasks, the authors seek instead to develop critical leadership perspectives and skills with chapters on vitally important topics such as strategies for maximizing the potential of the leadership team as a whole. They draw not only upon the literature in the field of educational leadership but also a wider literature in the field of business and management. This diversity of perspective ensures this book's appeal to a broad international readership.

*No Child Left Behind and the Reduction of the Achievement Gap* Alan R. Sadovnik, Jennifer A. O'Day, George W. Bohrnstedt, Kathryn M. Borman, 2013-10-11. This monumental collection presents the first ever sociological analysis of the No Child Left Behind Act and its effects on children, teachers, parents, and schools. More importantly, these leading sociologists consider whether NCLB can or will accomplish its major goal to eliminate the achievement gap by 2014. Based on theoretical and empirical research, the essays examine the history of federal educational policy and place NCLB in a larger sociological and historical context. Taking up a number of policy areas affected by the law, including accountability and assessment, curriculum and instruction, teacher quality, parental involvement, school choice, and urban education, this book examines the effects of NCLB on different groups of students and schools and the ways in which school organization and structure affect achievement. *No Child Left Behind* concludes with a discussion of the important contributions of sociological research and sociological analysis integral to understanding the limits and possibilities of the law to reduce the achievement gap.

**What Should I Do? Confronting Dilemmas of Teaching in Urban Schools** Anna Ershler Richert, 2015-04-17 Have you ever been waiting for THE book This is that book Anna Richert has held on to this book for many years because she wanted it to honor the profession and the work of teaching It satisfies on two important levels that of those who study teaching and those who do the teaching At a time when the profession is suffering from a lack of support and criticism on all fronts Richert elevates it without valorizing it These are real dilemmas that real teachers struggle with everyday We owe Anna Richert a big thank you for What Should I Do Gloria Ladson Billings Kellner Family

Chair in Urban Education University of Wisconsin Madison What Should I Do is a practical guide to the everyday dilemmas of the urban classroom It offers a lifeline to both beginning teachers who are struggling to be successful and to the teacher educators who are trying to prepare them for these challenges The author uses narratives of practice written by novice teachers to help readers experience a variety of dilemmas they are likely to encounter in the classroom By engaging with and analyzing the cases readers come to see that the problems of teaching are actually dilemmas that have no clear cut right or wrong solution thus reducing the potential for frustration and despair often felt by teachers This practical resource will empower teachers to transform the unpredictable world of troubled schools into places of learning and hope for both themselves and their students As a former teacher said I wish I had read this book and realized that I wasn't expected to have all the answers I would probably still be teaching Anna Ershler Richert is a professor in the School of Education at Mills College in Oakland California where she is Director of the Master of Arts in Education with an Emphasis on Teaching MEET Program and Faculty Director of the Mills Teacher Scholars

**Leadership for Mortals** Dean Fink, 2005-09-08 Overall and as one has come to expect from Fink this is a readable text that thinks outside the box of leadership theory I have no doubt that the text will be welcomed by many readers for an engaging style that places human interest at the heart of the discourse in the field Mark Brundrett writing in Educational Management Administration and Leadership It is a must read for those in educational leadership roles in schools both to gain invaluable insights and to draw on a framework for individual reflection Professor Brent Davies University of Hull I enjoyed reading this book The combination of critical reflection of his experience in the light of relevant literature makes for a lively and thought provoking book I was going to say little book because at times I would have liked to have read more But on the other hand it is the sort of book one the academic and the leader could read in one sitting enjoy and come back to for some ideas I recommend you to do so ESCalate This book provides a refreshing alternative to the rhetoric about superheads and mavericks that has been prevalent in some of the recent discourse about leadership Dean Fink draws heavily upon the work of Andy Hargreaves Michael Fullan and his own research with Louise Stoll so some of the ideas are familiar However what makes Leadership for Mortals interesting is the way in which he untangles the complexities of leadership by using genuine examples alongside the theory Dean Fink's writing is accessible and his anecdotal style should resonate with his intended audience of current and prospective leaders LDR The Magazine for School Leaders This book is a welcome antidote to the notion of school leaders as heroic figures Dean Fink's commitment to enhancing the life chances of young people shines through the pages Kate Myers Times Educational Supplement With great wisdom and insight Dean Fink invites us into his leadership stories to masterfully illustrate that school leadership is no longer a person but an intricate network of mortals working together to enhance learning experiences for students They are truly leaders of learning where commitment to successful learning for all students is the locus of their passion perseverance and persuasion Balanced with connections to respected leadership literature this lucid and eloquent

book will inspire current and future school leaders to reflect and develop their leadership practice to higher levels of effectiveness. An outstanding and optimistic read for all school leadership mortals, practitioners and scholars alike. I enjoyed it immensely. David Eddy, Director, First time Principals Programme, The University of Auckland. Practitioners will find this book at the same time reassuring and challenging. Fink includes stories of leadership that highlight effective strategies and some approaches that have gone wrong. They are real and ring true and therefore credible and instructive. Ken Thompson, Principal, Gladstone Park Secondary College, Australia. A great story about schools and their leaders progressing towards a knowledge driven world and the roads they choose to travel. Building sustainable communities of practice and the credible and varied examples of how the combination of leadership behaviour and enabling and disabling processes can make or break a successful school are clearly illustrated in *Leadership for Mortals*. A significant read for all aspirant and accomplished leaders. Jenny Lewis, Executive Officer, Australian Council for Educational Leaders. Dean Fink brings together a wealth of learning from his own experience as a leader and learner to provide some powerful messages. This is a well informed book with a strong theoretical basis but it is also personal and real, making sense of educational leadership in a way that is both profound and down to earth. School leaders in the UK and elsewhere will find inspiration, reassurance and challenge in this book. Steve Munby, Chief Executive, National College for School Leadership. Grounded in solid knowledge base and profound lived experience, Dean Fink's *Leadership for Mortals* provides deep insights on how ordinary practitioners could become great and sustainable leaders of learning. Fink's book is not a quick fix, how to do it manual. It stimulates us to reflect on education leadership both as a personalized, value laden journey and an art, as well as reminds us of the imperative issues of extraordinary commitment, effort and determination in making a difference on leading students and teachers learning. This is a must read book for aspiring and serving leaders in the field of education. Professor John Chi-kin Lee, Dean of Education, The Chinese University of Hong Kong, Hong Kong. Its style is conversational and unpatronizing yet it makes powerful statements about the key components that contribute to successful leadership. It is always practical and readers will come away from this book knowing they have learned something that they will be keen to try out for themselves. Readers will recognise leaders good and bad that they have come across at times being reassured that they are getting it right and at others despairing as they identify situations in which they too got it wrong. Fink's writing makes it clear that leadership is not exact science. He reminds us that although we are mortals with good mentoring and better training, our own potential has a better chance of being realised and that this is the best way to enable our students to achieve their own potential. *Journal of Research in International Education*. Leadership in recent years has become a growth industry. Politicians demand more of it, academics decry the lack of it and potential school leaders are deciding to hell with it. We are making the business of leadership so complicated that we seem to need John Wayne at his mythological best or Xena the Warrior Princess to run a school. Most educational leaders are not heroic but rather ordinary people who through extraordinary commitment, effort and

determination have become extraordinary and have made the people around them exceptional Educational leadership is more art than science it is more about character than technique it is more about inspiration than charisma it is more about leading students and teachers learning than the management of things This resource for prospective and practising school leaders motivates and inspires addresses the challenges of contemporary school leadership presents a model for leadership development selection and succession challenges existing and prospective leaders to develop and live by a set of core values based on students learning describes and explains the learnings required by effective leaders of learning describes the intellectual tool kit that leaders can develop describes the trajectories through which leaders proceed and the learnings required at each stage of the leaders evolution presents a template for leadership development and succession

**Teacher Leadership** Kokila Roy Katyal, Colin William Evers, 2014-03-14 In recent years teacher leadership has undergone one major revolution and is in the process of undergoing another The first came about as schools turned out to be far too complex for the responsibility of formulating and achieving their goals to be vested entirely in principals and head teachers As a consequence the rise of distributed leadership as an alternative model for understanding schools and their functioning is now commonplace The

second major revolution affecting teacher leadership is the rise of the Internet and ICT and the way these give rise to greater and more flexible opportunities for students to become autonomous learners Autonomous student learning now occurs in significant new ways and under parameters that are far more expansive than school based learning An effective model of teacher leadership thus needs to capture these changes in order to reflect the new realities of student learning and student engagement with their schools
