**Archaeological Method and Theory** Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus

the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodologi enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

**Reflections on the Marxist theory of history** Paul Blackledge, 2013-07-19 A decade after Francis Fukuyama announced the End of History anti capitalist demonstrators at Seattle and elsewhere have helped reinvigorate the Left with the reply another world is possible More than anyone else it was Marx who showed that slogans such as this were no utopian fantasies and that capitalism was just as much a historical mode of production no more natural and certainly no less contradictory than were the feudal and slave modes which proceeded it Paul Blackledge opens this study with a defence of the Marxist approach to the study of history against what he argues as being the naive empiricism of traditional historians and the relativism of the postmodernists He moves on to outline Marx and Engels analyses of concrete historical processes and their critiques of the alternative historiographic methodologies of their contemporaries He then discusses neglected historical works produced by Marxists in the half century or so after Marx and Engels deaths Two central chapters survey recent Marxist debates on first the nature of modes of productions including slave feudal and tributary systems and the revolutionary transitions between them and second the methodological debate over the issue of structure and agency in the movement of history Finally he shows the political relevance of these debates through a concluding survey of competing Marxist attempts to periodise the present postmodern conjuncture This book should be read by historians students of cultural social and political theory and anti capitalist activists

**Archaeological Theory** Robert Chapman, 2022-11-22 Archaeological Theory The Basics is an accessible introduction to an indispensable part of what archaeologists do The book guides the reader to an understanding of what theory is how it works and the range of theories used in archaeology The growth of theory and the adoption of theories drawn from both the natural and social sciences have broadened our ability to produce trustworthy knowledge about the past This book helps readers to see the value of archaeological theory and beyond what is sometimes thought to be just the use of indigestible jargon Key theories and concepts are introduced to the reader Among the main questions discussed are the following What is theory and why do we need it What major areas of theory are

and have been used and debated in archaeology What do they tell us about themes including human society evolution culture identity and agency How might archaeological theory change in the future This book is written mainly for readers new to archaeology and will help them to understand archaeological theory It assumes no prior knowledge of archaeological theory and presents it in a selective and clear way with case studies showing how theory is used in practice

**Remembering the Dead in the Ancient Near East** Benjamin W. Porter, Alexis T. Boutin, 2014-12-02 Remembering the Dead in the Ancient Near East is among the first comprehensive treatments to present the diverse ways in which ancient Near Eastern civilizations memorialized and honored their dead using mortuary rituals human skeletal remains and embodied identities as a window into the memory work of past societies In six case studies teams of researchers with different skillsets osteological analysis faunal analysis culture history and the analysis of written texts and artifact analysis integrate mortuary analysis with bioarchaeological techniques Drawing upon different kinds of data including human remains ceramics jewelry spatial analysis and faunal remains found in burial sites from across the region s societies the authors paint a robust and complex picture of death in the ancient Near East Demonstrating the still underexplored potential of bioarchaeological analysis in ancient societies Remembering the Dead in the Ancient Near East serves as a model for using multiple lines of evidence to reconstruct commemoration practices It will be of great interest to students and scholars of ancient Near Eastern and Egyptian societies the archaeology of death and burial bioarchaeology and human skeletal biology

**Resources, Power, and Interregional Interaction** Edward M. Schortman, Patricia A. Urban, 2013-03-09 Archaeological research on interregional interaction processes has recently reasserted itself after a long hiatus following the eclipse of diffusion studies This rebirth was marked not only by a sudden increase in publications that were focused on interaction questions but also by a diversity of perspectives on past contacts To perdurable interests in warfare were added trade studies by the late 1960s These viewpoints in turn were rapidly joined in the late 1970s by a wide range of intellectual schemes stimulated by developments in French Marxism referred to in various ways termed political ideology here and sociology Immanuel Wallerstein s world systems model Researchers ascribing to the aforementioned intellectual frameworks were united in their dissatisfaction with attempts to explain sociopolitical change that treated individual cultures or societies as isolated entities Only by reconstructing the complex intersocietal networks in which polities were integrated the natures of these ties who mediated the connections and the political economic and ideological significance of the goods and ideas that moved along them could adequate explanations of sociopolitical shifts be formulated Archaeologists seemed to be re-discovering in the late twentieth century the importance of interregional contacts in processes of sociopolitical change The diversity of perspectives that resulted seemed to be symptomatic of both an uncertainty of how best to approach this topic and the importance archaeologists attributed to it

[A History of Archaeological Thought](#) Bruce G. Trigger, 1989 Bruce Trigger s new book is the first ever to examine the history of archaeology from medieval times to the present in world wide perspective

At once stimulating and even handed it places the development of archaeological thought and theory throughout within a broad social and intellectual framework The successive but interacting trends apparent in archaeological thought are defined and the author seeks to determine the extent to which these trends were a reflection of the personal and collective interests of archaeologists as these relate in the West at least to the fluctuating fortunes of the middle classes While subjective influences have been powerful Professor Trigger argues that the gradual accumulation of archaeological data has exercised a growing constraint on interpretation In turn this has increased the objectivity of archaeological research and enhanced its value for understanding the entire span of human history and the human condition in general

From Primitives to Primates David Van Reybrouck, 2012 Where do our images about early hominids come from In this fascinating in depth study David Van Reybrouck demonstrates how input from ethnography and primatology has deeply influenced our visions about the past from the 19th century to this day often far beyond the available evidence Victorian scholars were keen to look at contemporary Australian and Tasmanian aboriginals to understand the enigmatic Neanderthal fossils Likewise today s primatologists debate to what extent bonobos baboons or chimps may be regarded as stand ins for early human ancestors The belief that the contemporary world provides living links still goes strong Such primate models Van Reybrouck argues continue the highly problematic comparative method of the Victorian times He goes on to show how the field of ethnoarchaeology has succeeded in circumventing the major pitfalls of such analogical reasoning A truly interdisciplinary study this work shows how scholars working in different fields can effectively improve their methods for interpreting the deep past by understanding the historical challenges of adjacent disciplines Overviewing two centuries of intellectual debate in fields as diverse as archaeology ethnography and primatology Van Reybrouck s book is one long plea for trying to understand the past on its own terms rather than as facile projections from the present David Van Reybrouck Bruges 1971 was trained as an archaeologist at the universities of Leuven Cambridge and Leiden Before becoming a highly successful literary author *The Plague* *Mission Congo* he worked as a historian of ideas For more than twelve years he was co editor of *Archaeological Dialogues* In 2011 12 he held the prestigious Cleveringa Chair at the University of Leiden

**Marx's Ghost** Thomas C. Patterson, 2020-08-06 How did our current society come into being and how is it similar to as well as different from its predecessors These key questions have transfixed archaeologists anthropologists and historians for decades and strike at the very heart of intellectual debate across a wide range of disciplines Yet scant attention has been given to the key thinkers and theoretical traditions that have shaped these debates and the conclusions to which they have given rise This pioneering book explores the profound influence of one such thinker Karl Marx on the course of twentieth century archaeology Patterson reveals how Australian archaeologist V Gordon Childe in the late 1920s was the first to synthesize discourses from archaeologists sociologists and Marxists to produce a corpus of provocative ideas He analyzes how these ideas were received and rejected and moves on to consider such important developments as the emergence of a new

archaeology in the 1960s and an explicitly Marxist strand of archaeology in the 1970s Specific attention is given to the discussion arenas of the 1990s where archaeologists of differing theoretical perspectives debated issues of historic specificity social transformation and inter regional interaction How did the debates in the 1990s pave the way for historical archaeologists to investigate the interconnections of class gender ethnicity and race In what ways did archaeologists make use of Marxist concepts such as contradiction and exploitation and how did they apply Marxist analytical categories to their work How did varying theoretical groups critique one another and how did they overturn or build upon past generational theories Marx's Ghost Conversations with Archaeologists provides an accessible guide to the theoretical arguments that have influenced the development of Anglophone archaeology from the 1930s onwards It will prove to be indispensable for archaeologists historians anthropologists and social and cultural theor

*Archaeological Theory in Europe* Ian Hodder, 2014-10-30 The 1980s witnessed exciting developments in theoretical writing in Western archaeology Where previous decades were dominated by the Anglo American perspective or New Archaeology the recent years showed the European debate grow in confidence and vitality This book published in 1991 captures this spirit of debate as contributors from a wide cross section of countries evaluate the development of the distinctly national and European characteristics of archaeology and assess future directions Contributors consider an extensive range of ideologies and viewpoints stressing the fundamentally historical emphasis and social construction of European archaeology The development of archaeological theory is traced with specific emphasis on factors which differ from country to country Ultimately it argues that the most active response to archaeology is to celebrate theory within a constantly critical mode A great insight into the development of theory
