## Gouffe Case:

*Murder Maps: Crime Scenes Revisited. Phrenology to Fingerprint. 1811-1911* Drew Gray, 2020-10-27 Vivid and intriguing Murder Maps plots the nineteenth century's most dramatic murders from around the world onto meticulous diagrams and period maps and recounts the brilliant detective work that solved the cases. Elegant period maps and compelling crime analysis illuminate this disquieting volume which reexamines the most captivating and intriguing homicides of the nineteenth century. Organized geographically, the elements of each murder from the prior movements of both killer and victim to the eventual location of the body are meticulously replotted using archival maps and bespoke plans taking readers on a perilous journey around the murder hot spots of the world. From the French Ripper Joseph Vacher who roamed the French countryside brutally mutilating and murdering at least eleven people to H H Holmes and his Murder Castle in Chicago, crime expert Dr Drew Gray recounts the details of each case. His forensic examination uncovers both the horrifying details of the crimes themselves and the ingenious detective work that led to the capture of the murderers. Throughout the book, Gray highlights the development of police methods and technology from the introduction of the police whistle to the standardization of the mug shot to the use of fingerprinting and radiotelegraphy in apprehending criminals. Vividly recreating over one hundred individual murder cases through historic maps, photographs, newspaper excerpts, court papers, and police reports, Murder Maps is perfect for everyone interested in criminal history, forensics, or the macabre.

*Little Demon in the City of Light* Steven Levingston, 2015-03-17 A delicious true crime account of a murder most gallic. Think CSI Paris meets Georges Simenon whose lurid combination of sex, brutality, forensics, and hypnotism riveted first a nation and then the world. In 1889, the gruesome murder of a lascivious court official at the hands of a ruthless con man and his pliant mistress launched the trial of the century. When Toussaint Augustin Gouff entered 3 rue Tronson du Coudray expecting a delightful assignation with the comely Gabrielle Bompard, he was instead murdered by Gabrielle and her lover Michel Eyraud. An international manhunt chased the infamous couple from Paris to America's West Coast, culminating in a sensational trial that investigated the power of hypnosis to possess, control, and even kill. As the inquiry into the guilt or innocence of the woman, the French tabloids dubbed the Little Demon, intensified, the most respected minds in France vehemently debated: Was Gabrielle Bompard the pawn of her mesmerizing lover or simply a coldly calculating murderess capable of killing a man in cold blood?

*Corpses and Skeletons* Rob Shone, Nick Spender, 2008-01-15 Forensic anthropology is a specialized field that uses the science of physical anthropology and osteology, the study of bones, to assist the law in identifying deceased individuals whose remains are decomposed, burned, or otherwise unrecognizable. Forensic anthropologists are often able to determine the age, sex, stature, and ancestry of the deceased as well as analyze any trauma or disease. In gripping, graphic nonfiction format, *Corpses and Skeletons: The Science of Forensic Anthropology* uses real-life cases to show how forensic anthropologists provide law enforcement with concrete data to help narrow down the possible identity of deceased
