instruction and principled reasoning This discussion tackles the barriers the eye of the beholder the tyranny of either or and standardized testing that hobble the capacities of educators and students Once these barriers are removed the determinants of comprehensive public education power policy and instruction emerge From these discoveries implications are derived that indicate how comprehensive public education engages educators and students with a transformed definition of educational adequacy The good public school depends on this and a complete readjustment of the purpose of US public education This search enables educators and parents caregivers to identify and establish the good public school without taking any chances
