Gothique Des Temps Modernes:

Le gothique des temps modernes Hélène Rousteau-Chambon, 2003 étudie les édifices gothiques des Temps modernes appelé aussi architecture néo gothique soit des guerres de Religion XVIe siècle la Révolution Française construits en milieu urbain. L'auteur développe la thèse selon laquelle un choix formel a marqué cette architecture. Celle-ci joue un rôle fondamental dans la représentation du sacré et la présence des voûtes d'ogives une forme architecturale ancienne témoigne d'une volonté d'assurer symboliquement la continuité de l'Église.

Histoire de L'art: Moyen âge et temps modernes Pierre Lavedan, 1944

Romanesque Renaissance Konrad Adriaan Ottenheym, 2021-01-11 In early modern times scholars and architects investigated age old buildings in order to look for useful sources of inspiration. They too occasionally misinterpreted younger buildings as proofs of majestic Roman or other ancient glory such as the buildings of the Carolingian Ottonian and Stauffer emperors. But even if the correct age of a certain building was known buildings from c 800-1200 were sometimes regarded as Antique architecture since the concept of Antiquity was far more stretched than our modern periodisation allows. This was a Europe wide phenomenon. The results are rather diverse in style but they all share an intellectual and artistic strategy: a conscious revival of an ancient architecture whatever the date and origin of these models.

Architecture, Print Culture and the Public Sphere in Eighteenth-Century France Richard Wittman, 2007. This book focuses on the complex ways in which architectural practice, theory, patronage and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution. Presenting a fresh theoretical orientation and a large body of new primary research, this book offers a new cultural history of virtually all the major monuments of eighteenth century Parisian architecture with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre, the Place Louis XV, the Place de la Concorde and the church of Sainte Genevieve, the Pantheon. Depicting the passage of architecture into a mediatized public culture as a turning point and interrogating it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period, this study will interest readers well beyond the discipline of architectural history.

Stereotomy José Calvo-López, 2020-08-08. This book deals with the general concepts in stereotomy and its connection with descriptive geometry, the social background of its practitioners and theoreticians, the general methods and tools of this technology and the specific procedures for the members built in hewn stone including arches, squinches, stairs and vaults, ending with a chapter discussing the open problems in this field. Thus it can be used as a reference book in the subject but it can also read as a compelling narrative on this subject, one of the main branches of pre-industrial technology. Construction in hewn stone requires the use of geometrical methods and tools to

assure that individual stones either blocks or voussoirs fit with one another and conform to the general shape of walls arches or vaults During the Late Middle Ages and the Renaissance such techniques and instruments were developed empirically by masons and architects Later on learned mathematicians and engineers introduced refinements in these procedures and this branch of knowledge known as stereotomy furnished much material to descriptive geometry a science born with the French Revolution which provided the foundation for projective geometry *Pour comprendre les monuments de la France* Jean-Auguste Brutails,1922 *Les églises romanes et gothiques du Comminges* Adeline Lespinasse,Pierre Lespinasse,1914
