merged easily but they can be used in proper combination to realize growth and economic transformation This book proposes more dialogue and complementarity between the two in the development effort of Africa and other regions In this collected volume contributed by experts and practitioners from both East and West the need to introduce Eastern ideas to the global development strategy is emphasized Analysis of British and other Western donor policies is given while Japanese Korean and other Asian approaches are also explained with concrete examples The concept of governance for growth is presented and the impact of rising China on development studies is contemplated The practices of industrial policy dialogues and actions assisted by East Asian experts are reported from Tunisia Zambia Ethiopia Rwanda and others The book should be applicable to all donors institutions NGOs and business enterprises engaged in development cooperation **Democracy and Civil**
