Economic Citizenship In The European Union Employment Relations In The New Europe:

Economic Citizenship in the European Union Paul Teague, 2005-10-25 Paul Teague explores the macro economic productive and institutional pressures faced by Europe's social model and assesses a number of economic and political programmes aimed at resolving the crisis. It also considers the role of the European Union building a social dimension to the European economy. The findings suggest that the future of traditional institutions of Social Europe is under threat. However, they also stress that we are not on the threshold of the Americanisation of European life. This study finds that the influential political forces that reject the dismantling of Europe's social model should not be preoccupied with defending inherited institutions. Instead, this book argues that they should encourage the construction of new forms of social solidarity compatible with the complexities of modern economic life.

Social Forces in the Making of the New Europe Andreas Bieler, 2001-06-26 The main argument of this book is that the revival of European integration in the mid 1980s and the emergence of a New Europe have to be analyzed against the background of globalization and the transnational restructuring of social forces since the early 1970s.

The Political Economy of European Employment Henk Overbeek, 2004-11-23 This edited collection examines unemployment in Europe in the context of globalisation, the implementation of European Monetary Union and the Eastern enlargement of the EU. It combines theoretical chapters with detailed case studies of Britain, The Netherlands, Italy, Spain and Central Europe.

Social Citizenship and Workfare in the United States and Western Europe Joel F. Handler, 2004-04-29 This book compares workfare policies in the United States and active labor policies in Western Europe that are aimed primarily at the long term unemployed, unemployed youth, lone parents, immigrants and other vulnerable groups often referred to collectively as the socially excluded. The Europeans maintain that workfare is the best method of bringing the socially excluded back into mainstream society. Although there are differences in terms of ideology and practice, Joel F. Handler argues that there are also significant similarities, especially field level practices that serve to exclude those who are the least employable or lack other qualifications that agencies favor. The author also examines strategies for reform including protective labor legislation, the Open Method of Coordination, the reform of social and employment services and concludes with an argument for a basic income guarantee which would not only alleviate

poverty but also provide clients with an exit option

Employment Law at the European Court of Justice Siófra

O'Leary, 2002-12-18 Despite the fact that the case law of the European Court of Justice on employment related issues has become increasingly erratic of late there is no denying the centrality of the Court's role in the development of EC employment law Though concentration on the work of the Court of Justice may no longer be in vogue this book examines its contribution in the employment law field in its political and economic context as well as with reference to the juridical structures within which the Community's judicial arm is obliged to operate The objective is not simply to critique the employment jurisprudence of the Court but also to examine the procedural operational and structural context in which the Court of Justice is obliged to work and to reflect on how this context may affect the jurisprudential outcome The book focuses in particular on the shortcomings of the preliminary reference procedure When the Court of Justice hands down decisions in the employment law field Article 234 EC dictates a particular type of judicial dialogue between it and the national referring courts It is contended that the dual dispute resolution public interest nature of the Court's role in the preliminary reference procedure goes some way to explaining why its answers are often regarded as unsatisfactory from the perspective of the referring court and users of EC law generally The book further outlines the developing Community policy on employment and reflects on the effect which this nascent policy may have on the balancing exercises which the Court is inevitably called upon to perform in a variety of social policy contexts Finally part two of the book examines specific substantive areas of EC employment law The policy considerations at play in the case law of the Court are discussed in detail as is the coherence of this case law with the Community's political stance on employment

Johnson,2005-04-12 Ailish Johnson examines national welfare state regimes of EU Member States and the features of the European Union and the International Labour Organization that encourage cooperation and assure outcomes of supranational cooperation higher than theories of inter state bargaining or social dumping would predict By tracing the development of EU and global social policy from the 1950s to today she identifies policy leaders resisters and passive states She concludes with an analysis of the forms and outputs of supranational social policy and suggests limits of social policy in an enlarged European Union

A Ruined Fortress? Alan W. Cafruny,Magnus Ryner,2003-06-28 This challenging book argues convincingly that research on European integration has lagged behind important theoretical developments in the fields of international relations international political economy and international organization The contributors contend that prevailing theories of integration despite their considerable differences all suffer from an excessive focus on institutions and ideas while overlooking the ways in which these institutions and ideas have promoted a neoliberal agenda during the last decade To overcome these weaknesses this volume draws on one of the key strands of theoretical innovation critical political economy or transnational historical materialism to develop a more comprehensive and consistent analysis of processes of European integration Although not claiming that states have ceded their role as masters of the treaties the contributors develop innovative case studies of national and transnational processes to illustrate the salience of trans European business networks and the primacy of neoliberalism as central organizing concepts of the post Maastricht European project Contributions by Baastian van Apeldoorn Hans Jürgen Bieling Alan W Cafruny Ben Clift Stephen Gill Colin Hay Otto Holman Henk Overbeek

Kees van der Pijl Magnus Ryner Thorsten Schulten Giles Scott Smith Leila Simona Talani and Matthew Watson **Behind the Myth of European Union** Ash Amin, John Tomaney, 2002-06-01 The vision of the original architects of the European Community was to create a Europe of economic prosperity and social harmony Economic integration has come ever closer but sustained growth and a reduction in social disparities seen as far away as ever This book examines the prospects for the real cohesion in Europe and find that far from promoting it many of the Community's current policies are divisive The neo liberal philosophy at the moment is producing policies which favour relatively wealthy regions and major corporations at the expense of less favoured regions and peoples **Library Acquisitions List** Martin P.
