A thorough historical account of the development of the principal paradigms of economic development is also included, and the important issues of institutional development and cultural change merit their own chapters. Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic, social, and ecological systems. The book has an accessible style and format. Plentiful diagrams, boxed summaries, and end-of-chapter questions help the reader to grasp many faceted topics. Coverage includes Latin America, Africa, and Asia, giving students a uniquely balanced world picture.

Examines internal factors such as poverty, protectionism, comparative advantage, public finance, and the global influence of multinational enterprise; the role of developed countries' economic and social policies; the international monetary system, etc. Maintains that big government, encouraged by development aid, is the biggest obstacle because it cripples competition.

The textbook's unique feature is its focus on the natural environment.
