**Handbook of the History of Economic Thought** Jürgen Backhaus, 2011-11-12 This reader in the history of economic thought challenges the assumption that today's prevailing economic theories are always the most appropriate ones As Leland Yeager has pointed out unlike the scientists of the natural sciences economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory In this book the life and work of each of the founders of economics is examined by the best available expert on that founding figure These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition These continental traditions differed substantially both substantively and methodologically from the Anglo Saxon orientation that has been dominant in the last century for example in the study of public finance or the very construct of the state itself This book maps the various channels of continental economics particularly from the late 18th through the early 20th centuries explaining and demonstrating the underlying unity amid the surface diversity In particular the book emphasizes the writings of John Stuart Mill his predecessor David Ricardo and his follower Jeremy Bentham the theory of Marginalism by von Thünen Cournot and Gossen the legacy of Karl Marx the innovations in developmental economics by Friedrich List the economic and monetary contributions and struggle of escape by John Maynard Keynes the formidable theory in public finance and economics by Joseph Schumpeter a reinterpretation of Alfred Marshall Léon Walras Heinrich von Stackelberg Knut Wicksell Werner Sombart and Friedrich August von Hayek are each dealt with in their own right *Economic Fables* Ariel

Rubinstein, 2012 I had the good fortune to grow up in a wonderful area of Jerusalem surrounded by a diverse range of people Rabbi Meizel the communist Sala Marcel my widowed Aunt Hannah and the intellectual Yaacovson As far as I'm concerned the opinion of such people is just as authoritative for making social and economic decisions as the opinion of an expert using a model Part memoir part crash course in economic theory this deeply engaging book by one of the world's foremost economists looks at economic ideas through a personal lens Together with an introduction to some of the central concepts in modern economic thought Ariel Rubinstein offers some powerful and entertaining reflections on his childhood family and career In doing so he challenges many of the central tenets of game theory and sheds light on the role economics can play in society at large *Economic Fables* is as thought provoking for seasoned economists as it is enlightening for newcomers to the field
