Economics An Introduction For South African Learners:

Economics John Pape, 2000 *Economics An Introduction for South African Learners* aims to provide students with a basic understanding of the subject and to provide a foundation to help them to further their study in the field. It presents economics in an interesting and accessible way by focusing on the current debates. This practical book has sections designed to build the learners' academic skills and it includes topics such as essay writing, the use of graphs and critical reading. Based on the author's extensive teaching experience, it has been written specifically for entry level economics students and those wishing to gain a rudimentary understanding of the subject.

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries, South Africa is a country with a unique economic history and distinctive economic features. It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS. However, there has been a lack of structural transformation and weak economic growth, and South Africa faces the profound triple challenges of poverty, inequality, and unemployment. Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments, robust empirical evidence, and rigorous analysis of South Africa's complex economic landscape. This volume seeks to provide a wide-ranging set of original, detailed, and state-of-the-art analytical perspectives that contribute to scientific knowledge as well as to well-informed and productive discourse on the South African economy. While concentrating on the more recent economic issues facing South Africa, the handbook also provides historical and political context. It offers an in-depth examination of strategic issues in the country's key economic sectors and brings together diverse analytical perspectives.

Learner Performance in South Africa Charles Edward Wickens, Simkins, Andrew Paterson, 2005 South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts. But the quality of the output from the school system has been questioned. In seeking to identify the reasons for this, it is important to relate educational outputs, competencies, as measured for instance by examinations or standardized tests, to inputs. Determining the relative contributions of the inputs of the school, the household, and the individual learner to educational outputs is not straightforward, particularly since very little educational production function analysis has been undertaken in South Africa. Until recently, no South African school data has incorporated test results, school characteristics, and information on the household circumstances of individual learners necessary for this kind of analysis. However, the results from a survey of a sample of schools involved in the large-scale Quality Learning Project (QLP), funded by the Business Trust, have yielded such data. The QLP data set offers a new analytical opportunity to address the question: What are the effects of social and economic variables on educational outcomes in the QLP schools?

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for

analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re-examined debated and questioned This volume the second of the *Oxford Handbook of Africa and Economics* reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book

Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education System Mr. Montfort Mlachila, Tlhalefang Moeletsi, 2019-03-01 While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers history race language geographic location and socio-economic status Low educational achievement contributes to low productivity growth and high levels of poverty unemployment and inequality Drawing on the literature the paper sketches some policy considerations to guide the debate on what works and what does not
