Careful Economics Maren A. Jochimsen, 2013-04-17

Much like their authors the ideas behind books can grow and change on the way from proposal to manuscript I originally planned to join the discussion on care and economics at a different more policy oriented level hoping to identify the conditions under which caring services are taken to the market In approaching the task however I realized that economic science lacked an overall concept of caring Economists notions of caring and their knowledge of its basic elements and structural characteristics were fragmented Caring activities were treated in the context of household work unpaid work or subsistence and informal work None of the different approaches shared a common frame of reference This has made it impossible to study caring activities across the various realms of the economy independent of whether provided in a family setting purchased on the market or supplied by the state or society I therefore found I had to begin my questioning earlier at the level of basic understandings

and concepts *The Economics of Smoking* Robert D. Tollison, Richard E. Wagner, 2012-12-06 Cigarettes are under political attack at all levels of government in the United States From Washington D C to state capitals to local governments proposals abound to increase the cigarette excise tax to impose smoking bans to prevent cigarette advertising to restrict the sale of cigarettes through vending machines to cut off the export of cigarettes to earmark the cigarette excise tax for health programs to divest the stock of cigarette companies and so on And all of these are purportedly being advocated in the name of health Undergirding and abetting the health argument is an economic argument that claims to place a value of up to 100 billion per year on the alleged health costs of smoking to the American economy which is more than 3 per pack of cigarettes smoked As our title suggests our interest lies in the economics of smoking and not in the health issues surrounding smoking We are professional economists and not medical scientists We will focus on what if any economic consequences arise for nonsmokers when smokers smoke For purposes of our discussion we simply accept the premise that smoking damages health and proceed with our analysis Since we have not studied the issue ourselves we have no way of knowing whether such a premise is true But it really does not matter for getting the economics of smoking right The important point resides in who pays for whatever to smoking **The New Palgrave Dictionary of Economics**, 2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product *Behavioral Economics and Smart Decision-Making* Ankal Ahluwalia, 2025-01-03 The illustrations in this book are created by Team Educohack Behavioral Economics and Smart Decision Making explores the modern approach to economics emphasizing the impact of psychology and human behavior We delve into various theories within this field including Prospect Theory measurement principles and heuristics and biases Our book also discusses how behavioral management modernizes traditional management practices Designed to enhance understanding this book is an essential resource for anyone interested in the intersection of economics and psychology *Voluntary National Content Standards in Economics* National Council on Economic Education, Foundation for Teaching Economics, 1997 This essential guide for curriculum developers administrators teachers and education and economics professors the standards were developed to provide a framework and benchmarks for the teaching of economics to our nation's children **Chaos and Society** A.
