Ecophilosophy Donald Edward Davis, 1989      **Homeplace Geography** Donald Edward Davis, 2006 These essays arranged chronologically in the order they were first written represent Donald Edward Davis's twenty year career as a writer, environmental activist and scholar of all things Appalachian. Join Davis in an exploration of a region consistently under attack by mining interests, developers and the tourist industry and consistently misunderstood by scholars. Approaching this unique region from both historical and environmental angles, Davis presents twenty essays to help illuminate the problems, peoples and places of what may be the oldest mountain range in the world. **BOOK JACKET**      *The Role of Trade Literature in Sci-Tech Libraries* Ellis Mount, 2019-12-06 This book first published in 1990 examines the relationship between sci tech materials and trade literature commonly called manufacturers catalogues. Because very little has been published about the value and nature of trade literature in regard to sci tech libraries, this volume is important in informing librarians about a little known segment of the larger picture of sci tech information sources, thus adding to the value of their services to their clients. It addresses the problems of handling sci tech trade literature in a corporate technical library, a large public library and a government library devoted to American history. Experts offer practical advice on selecting and organizing trade literature and on managing the growth and extent of a collection of trade literature. They discuss modern literature and older publications which often have great historical value. Libraries that collect both old and new materials are identified as are publishers of trade literature. The book also focuses on how a publisher of classic trade literature views its role.      **The Shaping of Environmentalism in America** Victor B. Scheffer, 2013-01-15 Victor Scheffer writes of a social revolution. Environmentalism began as a revelation that the resources supporting life are limited and that men and women can, if they act wisely and soon, reduce their material demands and their numbers before limits are reached and the richness of human existence is diminished forever. The revelation grew into a revolution driven by a morality of life or death for the human race. Environmentalism is not a word deeply rooted in the American vernacular. It was seldom used before the appearance of Rachel Carson's *Silent Spring* in 1962, although warnings about the environment had been sounded earlier. It has roots in conservation, the preservation and careful use of natural resources and in ecology, the study of the relationships between these roots. It describes areas of major concern to environmentalists in the sixties and seventies, ranging from wasted croplands and forests through endangered species to birth control. It reports progress on three fronts: educational, legal and political. Richly anecdotal, the book is an informal history of a generation of aroused citizens who began to see their outdoor surroundings and indeed all of Planet Earth in a new light. The formative years of the movement, 1960 to 1980, are central to the narrative. By 1980, environmentalism as a social science, a field of political management, a philosophy and to many a religion was firmly in place. The movement met with notable setbacks during the Reagan years, however, and Scheffer concludes his narrative with an epilogue highlighting environmental events from 1981 to 1989. Although veterans of the

movement will find much in the book familiar territory they will welcome the broad coverage of crises decisions and laws that set the stage for environmental victories As a new generation joins the environmental movement the book will help them understand the moral impetus that gave birth to environmentalism and the public awareness and concern for change that grew with the movement

**The Nature of Cities** Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part

of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

**Where There Are Mountains** Donald Edward Davis,2011-03-15 A timely study of change in a complex environment Where There Are Mountains explores the relationship between human inhabitants of the southern Appalachians and their environment Incorporating a wide variety of disciplines in the natural and social sciences the study draws information from several viewpoints and spans more than four hundred years of geological ecological anthropological and historical development in the Appalachian region The book begins with a description of the indigenous Mississippian culture in 1500 and ends with the destructive effects of industrial logging and dam building during the first three decades of the twentieth century Donald Edward Davis discusses the degradation of the southern Appalachians on a number of levels from

the general effects of settlement and industry to the extinction of the American chestnut due to blight and logging in the early 1900s This portrait of environmental destruction is echoed by the human struggle to survive in one of our nation's poorest areas The farming livestock raising dam building and pearl and logging industries that have gradually destroyed this region have also been the livelihood of the Appalachian people The author explores the sometimes conflicting needs of humans and nature in the mountains while presenting impressive and comprehensive research on the increasingly threatened environment of the southern Appalachians

Marcuse John Bokina, Timothy J. Lukes, 1994-04-29 Marcuse brings back to center stage one of the most celebrated and controversial philosophers of the turbulent 1960s the man Time magazine called the guru of the New Left In Reason and Revolution Eros and Civilization One Dimensional Man and other notable works Herbert Marcuse crystallized the essence of counterculture philosophy His neo Marxist critique of Western capitalism was widely embraced by revolutionaries hippies and an entire generation of academics who condemned political economic and sexual repression in American society So complete was Marcuse's identification with the New Left that with its demise he and his works fell out of favor But as this volume persuasively demonstrates Marcuse remains vitally relevant for us today Returning to Marcuse may recall the clash of idealistic exuberance and tragic violence associated with Woodstock Haight Ashbury the Vietnam War 1968 Democratic Convention Kent State and Earth Day as well as the passionate voices of anti war and civil rights protesters environmentalists feminists and free love advocates But this volume does not cater to the simplistic nostalgia of aging baby boomers Fifteen leading Marcuse scholars including Marcuse's son Peter assess the philosopher's ideas in the radically different theoretical and political contexts of the 1990s The range of topics covered is distinctly contemporary Foucault and postmodern theories analytical Marxism and the demise of the Soviet Union women's studies and feminist psychoanalytic theory aesthetic consciousness and postmodern art radical ecology and cybernetic technology and includes Douglas Kellner's revealing first look at the unpublished manuscripts in the Marcuse Archives in Frankfurt Sure to excite liberal as well as irritate conservative culture warriors these provocative essays illuminate the outlines of a Marcuse revival and the Next Left as both emerge to confront the complex challenges of our times

**Planet Dialectics** Wolfgang Sachs, 2015-03-12 All effects of human action will inevitably be played out within our planet's limits any hope of infinity is an illusion And yet as Wolfgang Sachs warned almost twenty years ago environmental concerns have been assimilated into the rhetoric dynamics and power structures of development This classic collection of trenchant and elegant explorations addresses the crisis of the Western world's relations with nature and social justice Examining the notions of efficiency speed globalization and development Sachs shows that sustainability truly conceived is incompatible with the worldwide rule of economism Planet Dialectics reveals that the Western development model is fundamentally at odds with both the quest for justice among the world's people and the aspiration to reconcile humanity and nature

Boersema, 2021-09-06 The environmental problematique is intimately bound up with deep seated human attitudes regarding our relationship with nature Here in the west those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers In this book the author re examines some of these seminal texts arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought with certain valuable traditions being all but lost in the process The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today Often misread on this point the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world A reappraisal of these sources is necessary and feasible There is no need for an appeal to cosmologies alien to our own culture nor for recourse to New Age beliefs in all their variety
