Equity and Efficiency in

Economic Development Donald J. Savoie,Irving Brecher,1992-10-16 The ideological foundations of the contributors range from personalized neo Marxism through extreme centre neo Keynesianism to hard line neoclassical mathematical economics Despite this diversity there is a surprising degree of consensus No contributor advocates centralized planning and none expects a free market to cure all economic ills Opinions vary as to how well the market actually works but all agree that equity and efficiency are essential goals which most consider to be complementary rather than mutually exclusive In the concluding chapter it is suggested that current economic problems are caused not so much by government intervention as by the nature of that intervention The authors believe that the recent ideological convergence may lead to a new paradigm a theory of the optimal blend of market and management that will be flexible enough to deal with the varying conditions of diverse societies thus simplifying the task of creating a smooth running global economy The contributors are Irma Adelman Mark Blaug Kenneth Boulding Irving Brecher Albert Breton John S Chipman Andr Gunder Frank Martha Fuentes Frank Niles

Pulling together the work of over 40 researchers, the book examines the role of government in economic advances and reform, provides a complete up to date survey of the literature on local and national economic development, details local and regional economic progress in the US, adopts an innovative interdisciplinary approach to the study of economic expansion and more.

**Promoting sustainable local economic development initiatives** Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development (LED) initiatives. It is generally believed that local governments are the foot soldiers of LED. However, this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives. The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways. The book is an essential part of this sequence of ideas, development and action at a critical time for strategic action directed at a sustainable future. It showcases case studies and responses to the impacts of globalisation as a bridge between urban, rural and institutional action and reveals avenues for local government leadership in communities, research, student engagement and wider interactions.
