Economic Intelligence and National Security Centre for Trade Policy and Law, 1998 Since the end of the Cold War competition among states has been waged along economic rather than ideological or military lines In Canada as elsewhere this shift has forced a rethinking of the role of intelligence services in protecting and promoting national economic security The scholars and practitioners featured here explore the aim existing mandate and practical applications of economic espionage from a Canadian and comparative perspective and present a range of options for policy makers Economic Intelligence National Security examines the laws in place to thwart economic spying and the challenges and ethical problems faced by agencies working clandestinely to support their national private sectors

**The Authorised History of British Defence Economic Intelligence** Peter Davies, 2018-06-27 This book is the first history of UK economic intelligence and offers a new perspective on the evolution of Britain's national intelligence machinery and how it worked during the Cold War British economic intelligence has a longer pedigree than the Joint Intelligence Committee JIC and was the vanguard of intelligence coordination in Whitehall yet it remains a missing field in intelligence studies This book is the first history of this core government capability and shows how central it was to the post war evolution of Whitehall's national intelligence machinery It places special emphasis on the Joint Intelligence Bureau and Defence Intelligence Staff two vital organisations in the Ministry of Defence underpinning the whole Whitehall intelligence edifice but almost totally ignored by historians Intelligence in Whitehall was not conducted in a parallel universe This contrasts with the conventional wisdom which accepts the uniqueness of intelligence as a government activity and is symbolised by the historical profile of the JIC The study draws on the official archives to show that the mantra of the existence of a semi autonomous UK intelligence community cannot be sustained against the historical evidence of government departments using the machinery of government to advance their traditional priorities Rivalries within and between agencies and departments and their determination to resist any central encroachment on their authority emasculated a truly professional multi skilled capability in Whitehall at the very moment when it was needed to address emerging global economic issues This book will be of much interest to students of British government and politics intelligence studies defence studies security studies and international relations in general
