Sustainability and Health Valerie A. Brown, John Grootjans, Jan Ritchie, Mardie Townsend, Glenda Verrinder, 2014-04-08 Radical changes in the biosphere and human interaction with the environment are increasingly impacting on the health of populations across the world. Diseases are crossing the species barrier and spreading rapidly through globalised transport systems. From new patterns of cancer to the threat of global pandemics, it is imperative that public health practitioners acknowledge the interdependence between the sustainability of the environment and the sustainability of the human species. Why are issues of global and local sustainability of increasing

importance to the public's health. Why do issues of sustainability require new practices within the professions of public health? How can future and current public health practitioners develop those new practices? Drawing on scientific evidence of global and local environmental changes, *Sustainability and Health* offers a thorough background and practical solutions to the overlapping issues in environment and health. It examines potential and existing responses to global and local environment and health issues involving individuals, community, industry, and government. The authors introduce a range of emerging conceptual frameworks and theoretical perspectives linking IT and epidemiology and explain how scoping can link program design, delivery, data collection, and evaluation in projects from their very beginning. Public health practitioners need to be able to manage health issues that cut across environmental, economic, and social systems and to develop the capacity for leadership in facilitating change. Incorporating learning activities, readings, international case studies, and an open learning approach, this is a valuable resource for students of public and environmental health as well as medical, environmental, and health science professionals.

It offers new or expanded material addressing community development, use of social media, internal organizational dynamics, electoral organizing, evaluation, assessment, and prevention of burnout for key leaders. There are also nuts and bolts articles by experts who address topics such as action research, lobbying, legal tactics, and grassroots fundraising.
