Egyptian Day:

Middle Egyptian James P. Allen, 2010-04-15 Middle Egyptian introduces the reader to the writing system of ancient Egypt and the language of hieroglyphic texts. It contains twenty-six lessons, exercises with answers, a list of hieroglyphic signs, and a dictionary. It also includes a series of twenty-five essays on the most important aspects of ancient Egyptian history, society, religion, and literature. The combination of grammar lessons and cultural essays allows users to not only read hieroglyphic texts but also to understand them, providing readers with the foundation to understand texts on monuments and to read great works of ancient Egyptian literature in the original text. This second edition contains revised exercises and essays providing an up-to-date account of current research and discoveries. New illustrations enhance discussions and examples. These additions combine with the previous edition to create a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields.

Ancient Egyptian Science Marshall Clagett, 1989 Marshall Clagett's three-volume study of various aspects of science of Ancient Egypt. Volume 1 concentrates on the origin and development of hieroglyphic writing, the scribal profession, and quasi-learned institutions in ancient Egypt. Professor Clagett has paid particular attention to the so-called Palermo Stone, the earliest annals composed in Egypt. Volume 2 covers calendars, clocks, and astronomical monuments. Volume 3 gives a discourse on the nature and accomplishments of Egyptian mathematics and also informs the reader as to how our knowledge of Egyptian mathematics has grown since the publication of the Rhind Mathematical Papyrus toward the end of the 19th century.

Books of Fate and Popular Culture in Early China Marc Kalinowski, Donald Harper, 2017-11-06 Books of Fate and Popular Culture in Early China is a comprehensive introduction to the manuscripts known as daybooks, examples of which have been found in Warring States, Qin, and Han tombs (453 BCE–220 CE). Their main content concerns hemerology or knowledge of good and bad days. Daybooks reveal the place of hemerology in daily life and are invaluable sources for the study of popular culture. Eleven scholars have contributed chapters examining the daybooks from different perspectives, detailing their significance as manuscript objects intended for everyday use and showing their connection to almanacs still popular in Chinese communities today as well as to hemerological literature in medieval Europe and ancient Babylon. Contributors include Marianne Bujard, László Sándor Chardonnens, Christopher Cullen, Donald Harper, Marc Kalinowski, Li Ling, Liu Lexian, Alasdair Livingstone, Richard Smith, Alain Thote, and Yan Changgui.

Chronological Systems of Byzantine Egypt Roger Bagnall, Klaas Worp, 2003-12-01 Egypt is the richest source of primary documents for the society of late antiquity. Its thousands of papyri provide insight into everyday life and topics ignored by ancient authors. This handbook is an indispensable tool in navigating these documents.

denied them That a population so enormous as that which owns the nominal sway of the Dragon Throne variously estimated at from 250 000 000 to 400 000 000 should present a field of most interesting enquiry is less strange than that so few enquirers should as yet have essayed to explore it The extreme difficulties of the language and the fact that few who study it for even conversational purposes do so except for a specific end and to fulfil some defined duty have doubtless mainly contributed to this state of affairs Whatever the cause however the fact remains that the folk lore of the oldest and most populous nation of the globe rich in the traditions of a period to which modern history is but a thing of yesterday has been hitherto almost ignored by even the most successful students of Chinese Those least acquainted with the people and their customs need not be assured that in China as in most other parts of the world there are certain subjects regarding which quaint and curious superstitions beliefs and practices obtain amongst the populace Unlike the civilized nations of Europe and America however China numbers amongst believers in the truth of these superstitions a vast public of some pretensions to education such as it is and of social position in the eyes of their countrymen The doings of every Chinaman from Emperor to coolie are affected and guided by astrological portents divinations etc in which even the more highly educated who affect to despise them place a practical trust The half cynical disbelief of the mandarin and literate becomes firm conviction in the peasant and China presents the now a days singular spectacle of an entire nation numbering over three hundred millions of souls whose everyday life is framed to meet the exigencies of a puerile system of superstition It must not however be supposed that these superstitious beliefs differ to any material extent from those current amongst humanity elsewhere The variations will be found to lie rather in detail than in principle and just as white replaces black for the mourning colour but leaves untouched the custom of adopting a special costume as a sign of grief so it will be found that a variation or even apparent contradiction in the beliefs we are about to deal with are in like manner the outcome of motives common to the inhabitants of almost all countries alike Thus the Scottish custom of opening the windows of the room in which a person has died to give the soul free egress is in some parts of China paralleled by the practice of making a hole in the roof The Lancashire superstition as to the first foot on New Year s Day finds its Chinese counterpart in the dislike expressed to meeting a woman or a Buddhist priest under such conditions I forbear to here enlarge upon such agreements in superstition as they will be found treated of at length in the following pages The one grand distinction between Chinese and European folk lore lies as above intimated in the different powers they exert over the respective communities In the one case it is either a matter only of amused indifference or of interested research to all but the lowest classes of the population In the other it represents an all pervading system of regulations believed in or complied with by high and low alike We must not however forget at how very recent a date we who now pride ourselves on our civilization and enlightenment were emancipated from the thralldom of similar and equally oppressive beliefs To turn for a moment to the page of western history we find that the belief in omens divinations c has ever since the earliest times influenced communities beside whom we incline with

somewhat undue arrogance to term the Chinese barbarous St Chrysostom and many of the early fathers inveighed against popular superstitions in no measured way In the eighth century we find a Council of Church dignitaries Pope Gregory III Charlemagne and his successors and the abbots and bishops of Scotland and France vehemently denouncing beliefs similar in all respects to those in vogue in China The great Martin Luther himself believed in superstitions as gross as any recorded 1 We turn with abhorrence from the story of Matthew Hopkins the witch finder and cannot forget that almost within the memory of our own great grandfathers the Puritans of the New World outvied in their superstitious bigotry the worst absurdities recorded in Chinese annals It is well to recall these matters to mind because the enlightenment of the present day is apt to sneer too unreservedly at the blind gropings after truth of less favoured races The popular folk lore of Norway Germany and Brittany presents features quite as quaint as those we shall come across in dealing with their Asiatic congeners

Football Revolution Carl Rommel,2021-07-27 Both a symbol of the Mubarak government's power and a component in its construction of national identity football served as fertile ground for Egyptians to confront the regime's overthrow during the 2011 revolution With the help of the state appreciation for football in Egypt peaked in the late 2000s Yet after Mubarak fell fans questioned their previous support calling for a reformed football for a new postrevolutionary nation In Egypt's Football Revolution Carl Rommel examines the politics of football as a space for ordinary Egyptians and state forces to negotiate a masculine Egyptian chauvinism Based on several years of fieldwork with fans players journalists and coaches he investigates the increasing attention paid to football during the Mubarak era its demise with the 2011 uprisings and 2012 Port Said Massacre which left seventy two dead and its recent rehabilitation Cairo's highly organized and dedicated Ultras fans became a key revolutionary force through their antiregime activism challenging earlier styles of fandom and making visible entrenched ties between sport and politics As the appeal for football burst alternative conceptions of masculinity emotion and
