

EIGHT THEORIES OF ETHICS

Is it possible to study ethics objectively, or are moral judgements inevitably subjective? Are ancient theories of ethics of any contemporary relevance? Which ethical theory offers the most convincing explanation of how best to live one's life?

Eight Theories of Ethics is a comprehensive introduction to the theories of ethics encountered by first-time students. Gordon Graham introduces the fundamental concepts that underpin ethics, such as relativism and objectivity, and then devotes his attention to each of the eight major theories of ethics:

- egoism
- hedonism
- naturalism and virtue theory
- existentialism
- Kantianism
- utilitarianism
- contractualism
- religion

Throughout the book, the exposition draws on examples from great moral philosophers such as Aristotle, Kant and Mill, as well as contemporary debates over human nature, the environment and citizenship.

Eight Theories of Ethics is written in an engaging and student-friendly style, with detailed suggestions for further reading at the end of each chapter – including original sources and contemporary discussions. It is ideal for anyone coming to this area of philosophy for the first time, and for those studying ethics in related disciplines such as politics, law, nursing and medicine.

Gordon Graham is Regius Professor of Moral Philosophy at the University of Aberdeen. He is the author of *The Internet: A Philosophical Inquiry* (1999), *Philosophy of the Arts* (second edition, 2000), and *Genes: A Philosophical Inquiry* (2002), all published by Routledge.

A Fundamental Mistake Graham Cliff, 2012-06-01 Does it puzzle you that despite ever increasing rules controls and counter measures antisocial behaviour is seemingly spiralling out of control Why have there been riots in Britain Why is law enforcement failing to make our society a better place in which to live Have our politicians lost the plot Are our values wrong *A Fundamental Mistake* explains why a change of direction is needed in society's thinking about how to get people to behave themselves it also offers a carefully argued strategy by which to achieve this The emphasis needs to shift away from coercion and punishment and towards inducement and reward The remarkable thing is that although we already have the necessary knowledge it's not put to good use Taking a fresh approach Graham Cliff draws on mainstream behavioural psychology and applied ethics to make his case for challenging some of our time honoured cultural assumptions and practices Be prepared to re think your position Despite the weightiness of the subject this is a book for everyone because it works up from first principles in a readily readable way No expertise is needed to follow the flow from the basics of human nature to the way our minds work then through the web of customs and rules that make up society on to government laws and punishment and finally to how and why things might be done differently Nobody will agree with everything that *A Fundamental Mistake* has to say because that's what debate is all about However it's as well to remember this when it comes to tackling antisocial behaviour it's not enough just to get tough we must get clever too

The Use and Abuse of Sport and Physical Activity Earle F. Zeigler, 2011-07-14 I am not against sport and related physical activity What I am arguing is that employed properly and correctly exercise and sport as one of a number of vital social forces e.g nationalism ecology could contribute to the improvement of the current situation in human health enormously Additionally in the case of related physical activity i.e regular exercise or physical activity education in the developed world I believe humans are too often abusing it by first not understanding it and then by not using it more intelligently Ironically in the undeveloped world people often get too much exercise just to stay alive Moreover I believe that the active use of competitive sport worldwide to promote what have been called moral values traits or attributes leading to world peace and good will as opposed to so called socio instrumental values that often are overly self serving This would tend to create a social force of such strength and power that humankind might be helped as it confronts the social and physical devastation looming ahead At the very least I believe such active promotion would delay to a considerable degree the onset of what is

increasingly becoming a destructive societal situation
