

The 18th Century Literature

- The Eighteenth Century is called the Classical Age in English literature on account of three reasons.
 1. In the first place, the term 'classic', refers in general, applies to writers of the highest rank in any nation. This term was first applied to the works of the great Greek and Roman writers, like Homer and Virgil.
- As the writers of the eighteenth century in England tried to follow the simple and noble methods of the great ancient writers, they began to be called Classical writers.

Eighteenth-century English Literature Maximillian E. Novak, 1984 *Reconcilable Differences in Eighteenth-century English Literature* William Bowman Piper, 1999 In this book Piper thus examines major works by Swift Gay Pope Radcliffe and Austen with the awareness of perceptualism that they must have possessed and describes the connections between their works and this philosophy BOOK JACKET *English Literature and Society in the Eighteenth Century* Leslie Stephen, 1907

Eighteenth Century English Literature and Its Cultural Background James Edward Tobin, 1967 *The Wiley-Blackwell Encyclopedia of Eighteenth-Century Writers and Writing 1660 - 1789* Paul Baines, Julian Ferraro, Pat Rogers, 2010-12-28 The Wiley Blackwell Encyclopedia of Eighteenth Century Writers and Writing 1660 1789 features coverage of the lives and works of almost 500 notable writers based in the British Isles from the return of the British monarchy in 1660 until the French Revolution of 1789 Broad coverage of writers and texts presents a new picture of 18th century British authorship Takes advantage of newly expanded eighteenth century canon to include significantly more women writers and labouring class writers than have traditionally been studied Draws on the latest scholarship to more accurately reflect the literary achievements of the long eighteenth century *Eighteenth-century English Literature*, 1960

book analyzes the impact of significant cultural developments on literary themes and forms including urbanization colonial and mercantile expansion the emergence of the public sphere and changes in sex and gender roles In eighteenth century Britain many of the things we take for granted about modern life were shockingly new women appeared for the first time on stage the novel began to dominate the literary marketplace people entertained the possibility that all human beings were created equal and tentatively proposed that reason could triumph over superstition ministers became more powerful than kings and the consumer emerged as a political force Eighteenth Century English Literature 1660 1789 explores these issues in relation to well known works by such authors as Defoe Swift Pope Richardson Gray and Sterne while also bringing attention to less familiar figures such as Charlotte Smith Mary Leapor and Olaudah Equiano It offers both an ideal introduction for students and a fresh approach for those with research interests in the period

The Cambridge History of English Literature, 1660-1780 John Richetti, 2005-01-06 The Cambridge History of English Literature 1660 1780 offers readers discussions of the entire range of literary expression from the Restoration to the end of the eighteenth century In essays by thirty distinguished scholars recent historical perspectives and new critical approaches and methods are brought to bear on the classic authors and texts of the period Forgotten or neglected authors and themes as well as new and emerging genres within the expanding marketplace for printed matter during the eighteenth century receive special attention and emphasis The volume s guiding purpose is to examine the social and historical circumstances within which literary production and imaginative writing take place in the period and to evaluate the enduring verbal complexity and cultural insights they articulate so powerfully

Backgrounds to Restoration and Eighteenth-Century English Literature, 1989-02-21 In this time of proliferating scholarship one of the most welcome publications is this intelligently selected and annotated bibliography of secondary material Understanding the value of selectivity Spector has limited his entries to books and significant articles Perhaps because of his avowed interest in redefining the period he has been careful to include articles on historiography and critical method which apply to the eighteenth century He has not however slighted the older works of twentieth century scholarship A valuable resource not only to students of literature abd related fields but to anyone interested in learning about the eighteenth century Analytical philosophy science aesthetics education and language in addition to literary criticism The author begins with a thoughtful examination of the history of Restoration eighteenth century scholarship Divided into 22 subject categories the bibliography presents annotated listings of existing bibliographic sources and noteworthy books and articles published since the late 1920s This authoritative new work allows the reader to explore the cultural climate that influenced the activity of writing and to understand the complex forces that shaped the period and its literature The bibliography is an appropriate choice for literary reference collections in academic and public libraries

The Age of Exuberance Donald J. Greene,1970 A summary of the history ideas attitudes and the arts of 18th century England

English Poetry of the Eighteenth Century, 1700-1789 David Fairer,2003 In recent years the canon of eighteenth century poetry has greatly expanded to include women poets labouring class and provincial poets and many previously unheard voices Fairer s book takes up the challenge this ought to pose to our traditional understanding of the subject This book seeks to question some of the structures categories and labels that have given the age its reassuring shape in literary history In doing so Fairer offers a fresh and detailed look at a wide range of material *Literary Research and the British Eighteenth Century* Peggy Keeran,Jennifer Bowers,2013-02-21 The 18th century in Britain was a transition period for literature Patronage either by a benefactor or through subscription lingered even as the publishing and bookselling industries developed The practice of reviewing books became well established during the second half of the century with the first periodical founded in 1749 For the literary scholar these gradual changes mean that different search strategies are required to conduct research into primary and secondary source material across the era *Literary Research and the British Eighteenth Century* addresses these unique challenges It examines how the following all contribute to the richness of literary research

for this era book and periodical publishing a growing literate society dissemination of literature through salons private societies and coffee houses the growing importance of book reviews the explosion of publishing and the burgeoning of primary source material available through new publishing and digital initiatives in the 21st century This volume explores primary and secondary resources including general literary research guides union library catalogs print and online bibliographies scholarly journals manuscripts and archives 18th century books newspapers and periodicals contemporary reception and electronic texts and journals as well as Web resources Each chapter addresses the research methods and tools best used to extract relevant information and compares and evaluates sources making this book an invaluable guide to any literary scholar and student of the British eighteenth century

ENGLISH LITERATURE ADVANCING THROUGH HISTORY 4 - The Eighteenth Century Petru Golban, 2022-12-28 It appears that literary work possesses eternal temporal validity due to its autonomous aesthetic value whereas criticism provides points of view having temporary and transitory significance Despite such claims the vector of methodology in our series of books dealing with the history of English literature relies on Viktor Shklovsky T S Eliot Mikhail Bakhtin and especially Yuri Tynyanov whose main reasoning would be that literature is a system of dominant central and peripheral marginalized elements to us tradition centre versus innovation margin engaged in a battle for supremacy demarginalization and the right to form a new literary system and the development or historical advancement of literature is the substitution of systems Roman Jakobson and French structuralism on the whole later Linda Hutcheon with her system and constant and Bran Nicol with the dominant to say nothing about Itamar Even Zohar and his theory of polysystem to a certain extent Julia Kristeva and even Homi Bhabha as well as our humble contribution we would like to believe maintain Tynyanov's line of thinking and concepts alive which have developed and emerged nowadays more like a kind of neo formalism Focusing on literary practice applying critical theory and emerging from within our own teaching experience the books in the present series are theoretical and surveyistic like a monograph whereas their more practical and text oriented aspect should appeal as a student handbook for didactic purposes in which certain literary works belonging to various writers of different trends movements and periods are analysed and compared with regard to their source form thematic arrangements ideas motifs character representation strategies intertextual perspectives structural or narrative techniques and other aspects

Mediating Identities in Eighteenth-Century England Isabel Karremann, Anja Müller, 2016-12-05 Through case studies from diverse fields of cultural studies this collection examines how different constructions of identity were mediated in England during the long eighteenth century While the concept of identity has received much critical attention the question of how identities were mediated usually remains implicit This volume engages in a critical discussion of the connection between historically specific categories of identity determined by class gender

nationality religion political factions and age and the media available at the time including novels newspapers trial reports images and the theatre Representative case studies are the arrival of children s literature as a genre the creation of masculine citizenship in Defoe s novels the performance of gendered and national identities by the actress Kitty Clive or in plays by Henry Fielding and Richard Sheridan fashion and the public sphere the emergence of the Whig and Tory parties the radical culture of the 1790s and visual representations of domestic and imperial landscape Recognizing the proliferation of identities in the epoch these essays explore the ways in which different media determined constructions of identity and were in turn shaped by them
