The Influence of Ancient Egypt on Modern Culture Omar Khalil, The fascination with Ancient Egypt's visual and structural aesthetics has significantly influenced Western art and architecture especially during the 18th and 19th centuries Known as the Egyptian Revival this movement emerged as part of a broader romantic and neoclassical interest in ancient civilizations Following Napoleon's campaign in Egypt and the publication of *Description de l'Egypte* Europe became enamored with Egyptian motifs leading to their incorporation into a wide range of architectural projects One of the most recognizable contributions of Egyptian Revival architecture is the use of obelisks and pyramid forms in public spaces and memorials These iconic shapes once central to Egyptian religious and ceremonial design were reinterpreted in cemeteries government buildings and monuments across Europe and the United States The Washington Monument in the U S for instance is a clear example of how Egyptian form was adapted to convey power and permanence In interior design and decorative arts Egyptian Revival made a mark through bold geometric patterns lotus flower motifs and symbolic elements like the sun disk and winged scarab Furniture wallpaper jewelry and textiles adopted these styles evoking the mystery and majesty of the Nile This decorative trend became especially popular after the discovery of King Tutankhamun's tomb in 1922 which triggered a new wave of Egyptomania in the early 20th century

Icons Nikodim Pavlovich Kondakov, 2023-12-28 Icon painting has reached its zenith in Ukraine between the 11th and 18th centuries This art is appealing because of its great openness to other influences the obedience to the rules of Orthodox Christianity in its early stages the borrowing from Roman heritage or later to the Western breakthroughs combined with a never compromised assertion of a distinctly Slavic soul and identity This book presents a handpicked and representative selection of works from the 11th century to the late Baroque period

Race Denise Eileen McCoskey, 2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person's physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one's skin lies at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory

during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal s seminal study *Black Athena* this is a powerful and original new assessment
