Departments of Labor and Health, Education, and Welfare,1976 **Autonomy in Education** Walter Berka,Jan De Groof,Hilde Penneman,European Association for Education Law and Policy,2000-04-13 The push towards greater autonomy is one of the three main trends in every modern educational policy alongside quality assurance and quality evaluation techniques and the need to devote attention to special and often disadvantaged target groups It is however difficult to derive a unified concept of autonomy from the comparative indicators which are published on a regular basis and it has emerged that there are significant differences depending on the specific area and the administrative organisation of education in the country in question During the discussions of the annual Congress of the European Association for Education Law and Policy ELA in Salzburg 1998 it was apparent that autonomy has to be considered in its various applications Autonomy for school boards is realised through management administrative mechanisms management of staff and pedagogical options Autonomy of administration requires competence the willingness to establish an autonomous administration and awareness of each party s responsibility in the educational process The contents of this Yearbook are an answer to the question of how legislatures are responding to the trend towards greater responsibility decentralisation and autonomy It is an overview of the efforts made by the Member States of the European Union to apply the principle of subsidiarity **Departments of Labor and Health, Education, and Welfare and Related Agencies Appropriations for Fiscal Year 1972** United States.

the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy
