Reeves,2018-05-08 Dream Hoarders sparked a national conversation on the dangerous separation between the upper middle class and everyone else Now in paperback and newly updated for the age of Trump Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America In America everyone knows that the top 1 percent are the villains The rest of us the 99 percent we are the good guys Not so argues Reeves The real class divide is not between the upper class and the upper middle class it is between the upper middle class and everyone else The separation of the upper middle class from everyone else is both economic and social and the practice of opportunity hoarding gaining exclusive access to scarce resources is especially prevalent among parents who want to perpetuate privilege to the benefit of their children While many families believe this is just good parenting it is actually hurting others by reducing their chances of securing these opportunities There is a glass floor created for each affluent child helped by his or her wealthy stable family That glass floor is a glass ceiling for another child Throughout Dream Hoarders Reeves explores the creation and perpetuation of opportunity hoarding and what should be done to stop it including controversial solutions such as ending legacy admissions to school He offers specific steps toward reducing inequality and asks the upper middle class to pay for it Convinced of their merit members of the upper middle class believes they are entitled to those tax breaks and hoarded opportunities After all they aren t the 1 percent The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America In Dream Hoarders Reeves argues that in many ways they are worse and that changes in policy and social conscience are the only way to fix the broken system

The Malfunction of US Education Policy Richard P. Phelps,2023-03-20 A 2023 Choice Reviews Outstanding Academic Title The Malfunction of US Education Policy Elite Misinformation Disinformation and Selfishness biased and inefficient information dissemination that has degraded US education research and policy since the year 2001 when a series of unfortunate disruptions began first the No Child Left Behind NCLB Act and federal imposition of an idiosyncratic and ineffectual testing program second the big bang reorganization of the US education testing industry from a stable cooperative oligopoly run by psychometricians to a commercially competitive free for all with more opportunist and customer pleasing ambitions and third the Common Core standards which mandated homogenous lower content standards onto the still required NCLB testing structure Billions from the federal government and wealthy foundations have transformed many once independent national education organizations into cargo cult dependents and promoters of the new order intolerant of divergent points of view The research and policy brain trust responsible comprised an alliance of convenience among two citation cartels of establishment and reform scholars and politicians and an astonishingly

cooperative and unskeptical group of journalists. It succeeded in focusing attention on their work while diverting attention away from a much larger universe of others' work by ignoring, dismissing, or demeaning it that included a century's worth of mostly experimental scholarship in the fields of psychology and program evaluation.
