*Handbook of Family Life Education* Margaret E. Arcus, Jay D. Schvaneveldt, J. Joel Moss, 1993-09-28 Handbook of Family Life Education covers a wide range of educational and preventive programs to improve the quality of individual and family life Although it has a long history only recently has there been a movement toward professionalization of these programs or an intellectual justification for them developed The Handbook of Family Life Education is the first to provide a framework for this field Its purpose is to provide an introduction to a critical perspective on family life education both its major intellectual themes and its areas of practice for researchers policymakers curriculum and program planners and practitioners Finally there is a comprehensive resource on family life education As the editors write in the preface previous handbooks included discussion of family life education but often only as one of the many chapters Further any earlier volume had become dated given the changes and evolving sophistication of the field A new reference resource was needed and these two volumes will meet that need Hats off to the editors Family Forum This book is the most extensive compilation of research and practice regarding family life education that has been written In the two volumes the editors have assembled a diverse group of scholars to describe the fundamental issues and to discuss the state of the art in family life education These two volumes provide an extensive foundation for scholars students and practitioners interested in family life education These volumes draw together an often disparate and disorganized body of knowledge and establish a basis for considering theoretical and methodological issues Many of the chapters provide thorough reviews and critiques of the family life programs and insightful recommendations about future decisions the Handbook of Family Life Education is a substantial contribution to the field and will be very useful in undergraduate and graduate courses on family life education and to scholars and practitioners interested in other important issues confronting the field Family Relations This is without a doubt the most complete encyclopedic treatise on family life education available on the market bar none It contains all the information that either beginning family life educators or consummate professionals need to know about this field past present and future I recommend it wholeheartedly not only to family life educators but also to marriage and family therapists Perhaps in the not too distant future all of the information contained in both volumes will be used by anyone who is interested in helping families regardless of professional identity or theoretical orientation Luciano L Abate Georgia State University

Rethinking Family-school Relations Maria Eulina de Carvalho, 2000-10-01 This book addresses the complications and implications of parental involvement as a policy through an exploratory theoretical approach including historical and sociological accounts and personal reflection This approach represents the author's effort to understand the origins meanings and effects of parental involvement as a prerequisite of schooling and particularly as a policy solution for low achievement and even inequity in the American educational system Most of the policy and research discourse on school family relations exalts the partnership ideal taking for granted its desirability and viability the perspective of parents on specific involvement in instruction and the conditions of diverse families in fulfilling their appointed role in the partnership De Carvalho takes a distinct stance She argues that the partnership parental ideal neglects several major factors It proclaims parental involvement as a means to enhance and perhaps equalize school outcomes but disregards how family material and cultural conditions and feelings about schooling differ according to social class thus the partnership parental involvement ideal is more likely to be a projection of the model of upper middle class suburban community schooling than an open invitation for diverse families to recreate schooling Although it appeals to the image of the traditional community school the pressure for more family educational accountability really overlooks history as well as present social conditions Finally family school relations are relations of power but most families are powerless De Carvalho makes the case that two linked effects of this policy are the gravest the imposition of a particular parenting style and intrusion into family life and the escalation of educational inequality

Rethinking Family School Relations A Critique of Parental Involvement in Schooling a carefully researched and persuasively argued work is essential reading for all school professionals parents and individuals concerned with public schooling and educational equality
