Einstein's War Matthew Stanley, 2019-05-23 Deeply researched and profoundly absorbing Matthew Stanley traces one of the greatest epics of scientific history An amazing story Michael Frayn author of Tony Award winning Copenhagen In 1916 Arthur Eddington a war weary British astronomer opened a letter written by an obscure German professor named Einstein The neatly printed equations on the scrap of paper outlined his world changing theory of general relativity Until then Einstein's masterpiece of time and space had been trapped behind the physical and ideological lines of battle unknown Einstein's name is now synonymous with genius but it was not an easy road He spent a decade creating relativity and his ascent to global celebrity owed much to against the odds international collaboration including Eddington's globe spanning expedition of 1919 two years before they finally met We usually think of scientific discovery as a flash of individual inspiration but here we see it is the result of hard work gambles and wrong turns Einstein's War is a celebration of what

science can offer when bigotry and nationalism are defeated Using previously unknown sources and written like a thriller it shows relativity being built brick by brick in front of us as it happened 100 years ago Riveting Stanley lets us share the excitement a hundred years later in this entertaining and gripping book It s a must read if you ever wondered how Einstein became Einstein Manjit Kumar author of Quantum

promoting Hong Kong Chinese children's critical thinking Forty two Secondary 1 students volunteered for the experiment from whom 28 students were randomly selected and randomly assigned to two groups of 14 each one receiving P4C lessons and the other receiving English lessons The students who were taught P4C were found to perform better in the reasoning test than those who were not to be capable of discussing philosophical problems in a competent way and to have a very positive attitude towards doing philosophy in the classroom It was also found that P4C played a major role in developing the students critical thinking Considering that the construction of children by adults as incompetent in the sense of lacking reason maturity or independence reinforces the traditional structure of adult authority over children in society it runs counter to the goal of fostering critical thinking in children As a way to return justice to childhood and to effectively promote critical thinking in children the present study suggested reconstructing the concept of childhood highlighting the importance of establishing a coherent public policy on promotion of agency in children and also the importance of empowering them to participate actively in research legal and educational institutions
