Educating Christian Teachers For Responsive Discipleship:

Educating Christian Teachers for Responsive Discipleship Peter P. DeBoer, 1993 Five members of the Calvin College Center for Christian Scholarship 1991-1992 team present some creative and constructive proposals for changes that could occur in the teacher education programs of hundreds of church-related colleges. Theoretically committed to a biblical vision of responsive discipleship, the authors sketch out: 1. a curricular theory that encourages many-sided encounters with created reality which stimulate varieties of student responses that should arise ultimately from a commitment of the heart; 2. a collaborative model of teacher education that urges congruent values to be held by the local school, school district, and the teacher education college; and 3. a curriculum that arises in part out of the laboratory of the classroom through the interaction of teacher and student in a school organized to develop collegiality among teachers and students where, through the use of evaluative portfolios, student teachers learn to be reflective practitioners of the art and craft of teaching. Co-published with the Institute for Christian Studies.

A Vision with a Task Gloria Goris Stronks, 1993 In this book, six educators develop a vision and recommend tasks for education that are distinctly Christian and academically sound. *A Vision with a Task* highlights three necessary elements which are crucial to encouraging children to become responsive disciples and seek shalom in the world.

The ^AOutrageous Idea of Christian Scholarship George M. Marsden, 1997-03-13 While other defining elements of a scholar's identity such as race or gender are routinely taken into consideration and welcomed as providing new perspectives, the perspective of the believing Christian is dismissed as irrelevant or worse, antithetical to the scholarly enterprise. *The Outrageous Idea of Christian Scholarship* demonstrates what the ancient relationship of faith and intellectual scholarship mean for the academy today. George Marsden argues forcefully that mainstream American higher education needs to be more open to explicit expressions of faith and to accept what faith means in an intellectual context. Marsden argues that a religiously diverse culture will be an intellectually richer one and it is time that scholars and institutions who take the intellectual dimensions of their faith seriously become active participants in the highest level of academic discourse. Whether the reader agrees or disagrees with this conclusion, Marsden's thoughtful well-argued book is necessary reading for all sides of the debate on religion's role in education and culture.
