Gould, 2014-09-25 This text examines

African Renaissance in the Millennium Emmanuel Ike Udogu, 2007-01-01 The book brings into sharp focus some of the major political social and economic issues that might impede Africa's development project in the 21st century It debates and suggests ways that policy makers might tackle these issues in order to promote the vision of the continent's transformation in the millennium **Nation-Building, Identity and Citizenship Education** Joseph Zajda, Holger

Daun, Lawrence J. Saha, 2008-12-16 A major aim of Nation Building Identity and Citizenship Education Cross cultural Perspectives is to present a global overview of selected scholarly research on global and comparative trends in dominant discourses of identity politics and nation building in comparative education research It provides an easily accessible practical yet scholarly source of information about the international concern in the field of nation building identity and citizenship education Above all the book offers the latest findings on discourses surrounding national identity nation building and citizenship education in the global culture It offers a timely overview of current issues affecting the formation of social identity and citizenship education in the global culture More than ever before there is a need to understand and analyse both the intended and the unintended effects of globalisation and the forces of globalisation on nations organisations communities educational institutions and individuals around the world This is particularly relevant to the evolving and constantly changing notions of nation states national identity and citizenship education globally Current global and comparative research demonstrates a rapidly changing world where citizens are experiencing a growing sense of alienation uncertainty and loss of moral purpose In this stimulating and important book the authors focus on discourses surrounding three major dimensions

affecting the national identity nation building and citizenship education debate in education and society ideology democracy and human rights These are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation building and identity Educational Issues in Multiethnic Malaysia Tan Yao Sua,R. Santhiram, Education in multiethnic societies is a subject of considerable debates in almost all parts of the world These debates have invoked strongly felt positions between competing ethnic groups over a host of issues that have a profound impact on the nation building process Apart from deep seated issues arising from contrasting internal demands over educational rights and equality emerging issues arising from external influences such as the global spread of English as a result of globalisation have also impacted the nation building process of multiethnic societies It is against this context that educational issues in multiethnic societies merit our attention In the case of Malaysia discourses over these issues are particularly intense and hotly contested by the different ethnic groups This is primarily because of the extreme difficulties in mediating these complicated issues which are impinged by competing socio cultural economic and political interests This book explores the contested terrains of education in multiethnic Malaysia It comprises seven chapters that cover three crucial areas of educational provisions and delivery namely education of ethnic minorities education and national integration and educational language policy These three crucial areas are often the prime concerns of policy makers in multiethnic societies who have to tread a thin line in resolving these issues which are underpinned by intense coterminous interests and inter ethnic competition and having the potential to generate conflicts contestation and power struggle As far as the Malaysian policy makers are concerned their efforts in resolving these issues have not been overly successful It is most unfortunate that their policy decisions are at times influenced by competing political and ethnic interests rather than guided by sound theoretical underpinnings that could put the educational development of the country on a stronger platform and a clearer trajectory

complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles *Third World*

Modernism Duanfang Lu,2010-11-02 This set of essays challenge interpretations of the development of modernist architecture in Third World countries during the Cold War The topics look at modernism s part in the transnational development of building technologies and the construction of national and cultural identity *Hegemony* Richard Howson,Kylie Smith,2008-05 The originality and depth of Gramsci s theory of hegemony is now evidenced in the wide ranging intellectual applications within a growing corpus of research and writings that include social political and cultural theory historical interpretation gender and globalization The reason that hegemony has been so widely and diversely adopted lies in the unique way that Gramsci formulated the problematics of structure superstructure coercion consensus materialism idealism and regression progression within the concept hegemony However in much of the contemporary literature the full complexity of hegemony is either obfuscated or ignored Hegemony through comprehensive and systematic analyses of Gramsci s formulation a picture of hegemony as a complex syncretism of these dichotomies In other words hegemony is presented as a concept that is as much about aspiration and progressive politico social relations as it is about regressive and dominative processes Thus the volume recognises and presents this complexity through a selection of contemporary theoretical as well as historico social investigations that mark a significantly innovative moment in the work on hegemony

Decolonizing Knowledge Radha D'Souza,Sunera Thobani,2025-04-24 Interdisciplinary scholars rethink strategies for moving contemporary decolonization politics forward by revisiting the writings of the mid 20th century anti colonial movements leading intellectuals Decolonizing Knowledge draws on intellectual histories of anti colonial thinkers who developed their ideas of decolonization through practical engagement with struggles for freedom from colonialism Reading works by J P S Uberoi Frantz Fanon Aim C saire C L R James and Andaiye among others interdisciplinary activist scholars reflect on the meaning of decolonization that emerged from anti colonial struggles of the past and its relevance today Each chapter in the volume reflects on one or more texts from anti colonial thinkers of the past to draw out the meaning of

decolonization as conceptualized by earlier generations providing key insights from their thinking and examining their relevance for contemporary struggles for racial gender and class justice With authors writing from multiple disciplines these essays straddle a range of themes from theory and practice art and literature gender and violence and political economy to address a subject that is preoccupying academia and activists in the 21st century Decolonizing Knowledge is an intervention into contemporary debates on decolonizing curricula and universities arguing that these calls need to be firmly engaged in wider social practices for justice and that they can learn much from those who wrote on the topic amid the 20th century s many struggles for freedom *The Production of Modernization* Hemant Shah,2011-03-11 How Daniel Lerner s seminal work contributed to the overall professionalization of communication theory and sociology *African Politics at American Universities and Colleges* Mark W.
