Education and the Cult of Efficiency Raymond E. Callahan, 2010-11-16 Raymond Callahan's lively study exposes the alarming lengths to which school administrators went particularly in the period from 1910 to 1930 in sacrificing educational goals to the demands of business procedures He suggests that even today the question still asked is How can we operate our schools Society has not yet learned to ask How can we provide an excellent education for our children **Education and the Cult of Efficiency** Raymond E. Callahan, 1970 **The Cult of Efficiency** Janice Gross Stein, 2001-11-01 We live in an age dominated by the cult of efficiency Efficiency in the raging debate about public goods is often used as a code word to advance political agendas When it is used correctly efficiency is important it must always be part of the conversation when resources are scarce and citizens and governments have important choices to make among competing priorities Even when the language of efficiency is used carefully that language alone is not enough Unilingualism will not do We need to go beyond the cult of efficiency to talk about accountability Much of the democratic debate of the next decade will turn on how accountability becomes part of our public conversation and whether it is imposed or negotiated Janice Gross Stein draws on public education and universal health care locally and globally as flashpoints in the debate about their efficiency She argues that what will define the quality of education from Ontario to India and the quality of health care from China to Alberta is whether citizens and governments can negotiate new standards of accountability The cult of efficiency will not take us far enough *Education and the Cult of Efficiency* Judith Oakes Weiss, 1989 **Education, Ethics and the "cult of Efficiency"** Paul Thomas Begley, 2004 **Education and the Cult of Efficiency** Raymond E. Callahan, 1964 **The New Cult of Efficiency and Education** Henry Thomas James, 1969 **Shaping the Superintendency** William Edward Eaton, 1990 Over 25 years ago in his now classic *Education and the Cult of Efficiency* Raymond Callahan warned of the obsession with business like efficiency coming to pervade educational thought Contributors to this book many of them students and friends of Callahan himself discuss Callahan's prescient views in light of current educational debates and trends expressing concern about bureaucratic and technocratic forces impacting on educational

Five Paradigms for Education T. Newell, 2014-11-20 Newell compares the fundamental assumptions of five major worldviews of education and their implications for classroom practice incorporating history and case studies and posing questions about the limits and benefits of employing each today Counting Out The Scholars William Bruneau, Donald C. Savage, Canadian Association of University Teachers, 2002-03-07 Canada's universities have lost their autonomy Under the guise of accountability reformers from government and large corporations have undermined the original purposes of these institutions insisting that they operate according to a business model The chief tool used to effect this change is the performance indicator a method of evaluation and ranking well suited to measuring sales per square foot for example but useless in assessing qualities such as critical thinking creativity and wisdom Evaluating use of performance indicators in Canada the United States United Kingdom and New Zealand the authors challenge readers to look beyond this narrow business based measure of value and to consider more creative and effective methods of evaluation Counting Out the Scholars is a penetrating analysis of current methods of performance evaluation in the university one that offers alternatives to the prevailing orthodoxy

The Wiley Handbook of Christianity and Education William Jeynes, 2018-07-26. A comprehensive source that demonstrates how 21st-century Christianity can interrelate with current educational trends and aspirations. The Wiley Handbook of Christianity and Education provides a resource for students and scholars interested in the most important issues, trends, and developments in the relationship between Christianity and education. It offers a historical understanding of these two intertwined subjects with a view to creating a context for the myriad issues that characterize and challenge the relationship between Christianity and education today. Presented in three parts, the book starts with thought-provoking essays covering major issues in Christian education, such as the movement away from God in American education, the Christian paradigm based on love and character vs. academic/industrial models of American education, why religion is good for society, offenders and prisons, the resurgence of vocational exploration, and its integrative potential for higher education and more. It then looks at Christianity and education around the globe, faith-based schooling in a pluralistic democracy, religious expectations in the Latino home church, based and community-centered higher education, etc. The third part examines how humanity is determining the relationship between Christianity and education, with chapters covering the use of Christian paradigm of living and learning, enrollment, student demographic and capacity trends in Christian schools after the introduction of private schools, empirical studies on the perceptions of intellectual diversity at elite universities in the US, and more. Provides the breadth and depth of knowledge necessary to gain a sophisticated and nuanced understanding of the complex relationship between Christianity and education and its place in contemporary society. A long-overdue assessment of the subject, one that takes into account the enormous changes in Christian education. Presents a global consideration of the subject. Examines Christian education across elementary, secondary, and post-secondary levels. The Wiley Handbook of Christianity and Education will be of great interest to Christian educators in the academic world, the teaching profession, the ministry, and the college and graduate-level student body.
