To this end, IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration, curriculum, instruction, law, and research. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Handbook of Education Politics and Policy Bruce S. Cooper, James G. Cibulka, Lance D. Fusarelli, 2008-06-30. Written by a mix of established and rising stars in school politics, policy, law, finance, and reform, this comprehensive Handbook provides a three part framework that helps organize this relatively new and loosely organized field of study. A central theme running through the book is how to harness politics to school equity and improvement. Key features include Thematic Discussions: detailed discussions of key topics in educational politics are organized by themes and competing perspectives. The overarching themes are 1) the goals of the U.S. political system: justice, equity, opportunity, efficiency, and choice; 2) the means and resources for reaching these goals; and 3) the political behaviors and compromises that seek to mitigate ideological differences and conflicts of interest. Research Oriented: in addition to summarizing the latest research connected to key topics, each chapter exemplifies and reports on the methods and techniques for further exploration of these topics. Reform Oriented: throughout the book, and especially in the summarizing chapter, authors provide suggestions for improving the political behaviors of key educational groups and individuals: unions, superintendents, politicians, school boards, teachers, and parents.

It's Time for a Change Matthew Lynch, 2012. China, Japan, and South Korea understand that well educated workers are crucial for survival in the competitive global economy. Thus they are placing enormous emphasis on education, ensuring that their students receive instruction not only in foundational reading and math, but are also taught to think creatively and solve problems. Their youth are poised to take on and conquer the world. The U.S. on the other hand is losing the battle. School systems are using more money but have less to show for it. Test results, especially among the lower socioeconomic classes, are dismal. America has extraordinary natural resources, a solid functioning democracy, and excellent infrastructure, but unless we can reform our educational system to produce students who are able to take advantage of new technologies and compete in the global economy, we will cede our position as world leader. *It's Time for Change: School Reform* provides a no nonsense

Whole-school Success and Inclusive Education Wayne Sailor, 2002 A breakthrough for those concerned about improving education and schooling in our nation Tackling tough contemporary issues this volume discusses provocative dilemmas with clarity and precision it challenges us to think more deeply about reform and about the kind and quality of services America owes its children and itself It is a work that will endure as both a challenge to our thinking and a call to action

Spinning Wheels Frederick M. Hess, 2011-04-01 Almost everyone agrees that America s urban schools are a mess But while this agreement has fostered widespread support for aggressive reform Frederick Hess argues that much of

what ails urban education is actually the result of continuous or fragmentary reform Hess explains that political incentives drive school superintendents to promote reforms to demonstrate that they are making a difference Superintendents have to do this quickly both because their tenure is usually three years or less and because urban communities are anxious to see educational improvement However the nature of urban school districts makes it very difficult to demonstrate concrete short term improvement The result is what he terms policy churn which distracts teachers and principals from efforts to refine classroom teaching while seldom resulting in successful long term changes Hess argues that policymakers have misallocated resources by pursuing the right structure or the best pedagogy while paying insufficient attention to the more mundane and more important questions of how to implement refine and sustain a particular approach in their particular district Hess explains that previous research on high performing schools suggests that the best schools are characterized by focus and by an ability to develop expertise in specific approaches to teaching and learning To help educators and policymakers adopt and nurture a focused agenda he recommends institutional changes that increase the effectiveness of performance outcomes and reduce the incentives to emphasize symbolic reform

Leading Diverse Schools Jim Ryan, 2006-04-11 This book explores the challenges that school administrators face in ethnically diverse contexts Based on an empirical study it shows how principals do or do not promote inclusive practices in their schools This volume is the first of its kind to specifically target school administrators and ethnic diversity It will be of interest to school administrators prospective administrators teachers graduate students and academics
