**Educational Achievement in Japan** Richard Lynn, 1988-02-16 Educational standards in Japan are the highest in the world In this first comprehensive study of these standards Professor Richard Lynn concludes that Japanese teenagers are about two years ahead of their contemporaries in Europe and the United States Educational Achievement in Japan Richard Lynn, 1988-02-16 Educational standards in Japan are the highest in the world In this first comprehensive study of these standards Professor Richard Lynn concludes that Japanese teenagers are about two years ahead of their contemporaries in Europe and the United States *Lessons of Cross-national Comparison in Education* David Phillips, 1992-01-01 This collection of articles is a contribution to the debate about two important questions in the study of comparative education What lessons can be learned from cross national studies of issues in education and What problems of comparative method do such studies have to address Education and Training in Japan Thomas P. Rohlen, Christopher Bjork, 1998 This collection written by Japanese and foreign scholars represents an inclusive cross section of the most important work in key areas of this field Topics include the impact of Japanese education and training on Japan's economy and culture the Japanese influence on the East Asian approach to education in comparison with the educational systems of Korea Taiwan Singapore and Hong Kong Japan's promotion of learning organizations and Knowledge workers for the Information Age **Japanese Education** Roberta E. Pike, 2007 Presents a large representative sample of the literature on Japanese education with an emphasis on its psychosocial aspects Many discussions compare the Japanese educational system with that of the United States and other countries The citations cover most of the 1990s including a few earlier and later references Includes extensive discussions about Japanese educational reform movements and their consequences Also cites published and unpublished dissertations and theses Updates the last comprehensive English language bibliography on Japanese education published by Ulrich Teichler in 1974 The citations were taken from many online databases Suitable for students teachers scholars and the general public **Learning from Comparing: new directions in comparative education research** Robin Alexander, Marilyn Osborn, David Phillips, 2000-01-01 Learning from Comparing is a major two volume study which reassesses the contribution of comparative educational research and theory to our understanding of contemporary educational problems and to our capacity to solve them At a time when educational research is under attack on the grounds of bias and irrelevance and under pressure to address only those questions which are acceptable politically as good a definition of bias as any this is a serious attempt to bridge the worlds of research policy and practice The editors have put together a collection in terms of both perspective and nationality which ensures contrasting viewpoints on each topic **Learning To Be Modern** Byron Marshall, 2018-03-08 Emphasizing the political discourse and conflict that have surrounded Japanese education this book focuses on the three main issues of central versus local control elitism versus equality and nationalism versus universalism **Japan as (Anything but) Number One** Jon Woronoff, 2016-09-16 A full

scale examination of the 1979 Sino Vietnamese War the events that led to it the Cold War aftermath and the implications for the region and beyond Education, Society, and Development Jandhyala B. G. Tilak,2003 Contributed articles

**Reflections of the Japanese Education System in Britain** Mari Hiraoka,2024-10-28 This book explores British reflections of Japanese education between 1858 and 1914 by referring to accounts by British observers derived from documentary sources such as newspapers journal articles published books and official reports Hiraoka argues that British attitudes and comments on Japanese education reflect concerns about their own education system International economics and politics of the time as well as the voices of the Japanese are also taken into account British interpretations of the advantages of Japanese education are explained with two seemingly contradictory views traditions inherited in Japan and modern institutions newly introduced using the Western model The book illustrates how this dual view of Japan affected the rise and fall of British interest in Japanese education over half a century It also explores a broad range of phenomena educational reforms legislation and practice science networks exhibitions international trade and military affairs to observe how Japanese education was viewed by the British It consults a wide range of primary sources most of which are published or digitally archived Shedding new light on the transnational history of the educational relationship between Japan and Britain this book will be an attractive base for future researchers in the fields of history of education cultural history and comparative education Japan as -anything but- Number One J. Woronoff,1996-10-11 Japan as anything but Number One should be everybody s number two book to read about Japan After almost any introduction that lays out the claims made for Japan s truly unusual economy and society the next step forward should be to read an informed critical text to set a contrast in the mind No book achieves this more concisely more accurately and more succinctly than Japan as anything but Number One James Y Bourlet Professor of Japanese Management London Guildhall University Is Japan No 1 Well maybe it is if you only consider those sectors where it has been particularly successful But not if you add many others where its performance was mediocre or worse Is Japan No 1 Well maybe it is if you ask the foreign friends who have made a career and sometimes a fortune as apologists of Japanese causes But if you ask the Japanese themselves you will find that they are anything but satisfied Is Japan No 1 Well maybe it is if you are taken in by the tatemae i e the official version or how its admirers like to picture it But it does not look so great once you perceive the honne i e the realities of life in Japan Is Japan No 1 Well maybe it is if you take what is best in Japan and contrast it to what is less good in foreign countries But it does not compare so well if you mix the good with the bad in both places No the author does not think that Japan is a horrible place or that its leaders have made a complete mess of things But if you look closely it is certainly not the extraordinary success it is frequently claimed to be It is closer to the mean with many serious problems that will only get worse if people foolishly assume it is No 1 Japan-U.S. Relations ,1992 **The East Asian Welfare Model** Roger Goodman,Huck-Ju Kwon,Gordon

White,2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of

the state's intervention in society Neoliberals grew excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society

World Yearbook of Education 2012 Gita Steiner-Khamsi, Florian Waldow, 2012-03-12 The phenomenon of travelling reforms has become an object of great professional interest and intensive academic scrutiny The fact that the same set of educational reforms is transferred from one country to another made scholars wonder whether policy transfer has increased as a result of globalization But also the fact that policy makers increasingly import best practices and international standards and use them as a tool to accelerate reform has captured the imagination of many that deal with policy studies An international comparative perspective is key for understanding why reforms travel from one corner of the world to another Not surprisingly the study of policy borrowing and lending constitutes one of the core research topics of comparative policy studies a new area of research that links comparative education with policy studies The World Yearbook of Education 2012 brings together a diverse range of perspectives on education policy through contributions from internationally renowned authors It reflects on the way policy borrowing and lending is reconfiguring the world of education and offers a new collection of insights into the changes occurring across the world It particularly focuses on The political and economic reasons for policy borrowing The agencies international networks and regimes that instigate policy change The process of borrowing and lending The impact of these systems agendas and institutions on indigenous settings This book will prove invaluable to researchers of globalization and to policy experts especially those interested in comparative and international educational studies It is also essential reading for undergraduate and postgraduate students and anyone involved in the sociology economy or history of education Gita Steiner Khamsi is Professor of Comparative and International Education at Teachers College Columbia University New York US Florian Waldow is Research Director at the University of Münster Germany
