We argue that this is a crucial time for educational psychology as a field to refocus its attention on the evidence base for its contribution to teacher education. In revisiting the recommendations of the APA Division 15 committee charged with examining the role of educational psychology in teacher education (Anderson et al., 1995), we note positive changes in educational psychology courses for preservice teachers. We then identify and discuss three immediate challenges for educational psychologists: (a) communicating the relevance of educational psychology research to the wider education community, (b) developing collaborative relationships with colleagues in teacher education programs that support a common discourse and shared vision of effective teacher preparation, and (c) documenting the ways that educational psychology courses make a difference to the practice of graduating teachers and to the educational experiences of their K–12 students. We conclude with suggestions for addressing these challenges.

Most educational psychologists probably believe that an important role of educational psychology is to contribute to the education of preservice teachers. This has certainly been the case throughout the history of our discipline (Dewey, 1897/1998; Hilgard, 1996; James, 1899; Thorndike, 1910). Furthermore, educational psychologists have considerable expertise in learning, development, motivation, classroom management, and assessment—content that is integral to effective teaching and vital for prospective teachers to learn.

But does our involvement in teacher education make a difference in terms of how graduating teachers teach? Are teachers more effective for having taken our courses? Presumably we believe so, but how do we know? And how do we convince others who may be skeptical about the role of educational psychology in teacher education? These are questions we¹ have been reflecting on a lot lately, with concern. We believe that this is a crucial time for educational psychology as a field to refocus its attention on the evidence base for its

goal in this edition is to capitalize on these advances to produce a book that meets three goals to provide the most conceptually sound theory possible to include up to date research and to prepare a text that provides the most concrete and specific suggestions in the field for applying the content of Educational Psychology in PreK 12 classrooms Upon the advice of Kevin Davis our editor to reflect the third goal and symbolize an essential thrust of our text we have changed its name to Using Educational Psychology in Teaching Many students can describe and explain the topics included in an educational psychology text but far fewer know how as teachers to apply these topics to increase their students learning We attempt to reach our third goal above in several ways First we introduce each chapter with a case study in which a teacher is applying the content of the chapter to increase student learning and development We then integrate the case studies throughout the chapters in attempts to make the content of each meaningful for readers and further illustrate how educational psychology can be used in teaching to increase student learning We expand on this process by including one or more sections in each chapter titled Using Educational Psychology in Teaching Suggestions for Applying with Your Students In these sections we include specific suggestions for applying for instance Vygotsky s theory of cognitive development social emotional learning culturally responsive teaching universal design for learning social constructivist views of learning theories of motivation formative assessment and so on in classrooms We then illustrate each of these suggestions with concrete examples taken from the real world of PreK 12 teaching As a further illustration the video episodes on which the case studies integrated throughout chapters 2 9 11 13 and 14 are based are included with the MyLab Education component that accompanies this text These episodes show the actual classroom lessons and provide students with authentic real world insights into learning and teaching and they will hopefully make the written case studies and chapter content more meaningful for readers In addition to these specific suggestions we include Classroom Connections which provide additional suggestions for applying the content of each section at the elementary middle school and high school levels and we include Developmentally Appropriate Practice sections in each chapter that offer suggestions for adapting the content for different developmental levels Also in each chapter we include two three or four Application Exercises placed throughout the chapter that ask readers to apply the chapter content to the real world of teaching A total of 47 exercises are included in the book s 15 chapters 38 of which are based on video episodes of approximately five minutes or less leaving 9 that are based on written case studies Feedback for all the Application Exercises is included In the eText we include Video Examples ranging from approximately 40 seconds to 2 minutes in length that provide brief concrete illustrations of the chapter content The Video Examples are placed next to the topics they illustrate
