Ecotheology and the Practice of Hope Anne Marie Dalton, Henry C. Simmons, 2010-09-29 Is there any hope for a more sustainable world Can we reimagine a way of living in which the nonhuman world matters Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope While ecotheologians acknowledge that Christianity played a significant role in

creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world To borrow philosopher Charles Taylor s concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope imparted by ecotheology has already been realized While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

Climate change is a defining issue of our time for which the immediate as well as potential future scope causes enormous impediments to human understanding and comprehension. It is argued here that humans ought to make wise use of their capacity of thinking language and communication in working on the task of responsible action. Required is nothing less than moving out of thoughtlessness, an unresponsiveness and ignorance in particular towards certain environmental problems. As human beings we are a species on this planet that is uniquely capable to think and foresee potential consequences and hold power to induce change on our actions. It is up to human beings to confront challenges such as climate change to consider what has been critically assessed in thought and reflect on potential responses. Crucial in this dialog is the ability to take the standpoint of the other including that of species as well as ecosystems in human imagination. It also means to develop a sensibility for the other in making sense of the world that today is largely shaped by humans. Throughout history narratives, stories, images, artistic expressions have all played a key role for imaginative ventures that allow the mind to imagine the past, present and the future. Language and communication can serve comprehension of an issue like climate change and provide a path in developing responsible responses to abstract problems of complex global future dimensions. **Environment** Kenneth E. Hornback, W. Keith Warner, 1972. **Thought, Law, Rights and Action in the Age of Environmental Crisis** Anna Grear, Evadne Grant, 2015-07-31.
