**Library Linked Data in the Cloud** Carol Jean Godby, Shenghui Wang, Jeffrey K. Mixer, 2022-06-01 This book describes OCLC's contributions to the transformation of the Internet from a web of documents to a Web of Data. The new Web is a growing cloud of interconnected resources that identify the things people want to know about when they approach the Internet with an information need. The linked data architecture has achieved critical mass just as it has become clear that library standards for resource description are nearing obsolescence. Working for the world's largest library cooperative, OCLC researchers have been active participants in the development of next generation standards for library resource description. By engaging with an international community of library and Web standards experts, they have published some of the most widely used RDF datasets representing library collections and librarianship. This book focuses on the conceptual and technical challenges involved in publishing linked data derived from traditional library metadata. This transformation is a high priority because most searches for information start not in the library nor even in a Web accessible library catalog but elsewhere on the Internet. Modeling data in a form that the broader Web understands will project the value of libraries into the Digital Information Age. The exposition is aimed at librarians, archivists, computer scientists, and other professionals interested in modeling bibliographic descriptions as linked data. It aims to achieve a balanced treatment of theory, technical detail, and practical application.

**Backing The Bold: A Primer On Early-stage Venture Capital In Southeast Asia** Paulo Joquino, 2022-09-20 Backing the Bold is a primer on the venture capital industry business and profession in Southeast Asia. The goal of the book's thirteen chapters has initially been to guide students of the Insignia Ventures Academy, Asia's first experiential venture capital accelerator, in their exploration of the venture capital industry and profession specifically in the context of Southeast Asia's startup ecosystem and from the perspective of Insignia Ventures and its portfolio founders. Rather than being a book in the traditional sense of the word, such as an origin and context for Backing the Bold, it has inevitably made this book a dynamic piece of literature continuously growing and improving thanks to every new group of people who become part of the VC accelerator as organizers, mentors, or participants. Now in print and in distribution, this first edition is available for all as a snapshot of Backing the Bold's progress as a continuously evolving repository of insights, best practices, and frameworks. It is for readers of any background or motivation to gain a better understanding of the venture capital investment process, portfolio management, and profession in the context of Southeast Asia's fast-growing technology markets.
