Economic Development And Women In The World Community:

Economic Development and Women in the World Community Hans C. Blomqvist, Kartik Roy, Clement A.

Tisdell, 1996-02-16 After reviewing theories about how women are likely to fare as a result of economic development the editors and their contributors focus on the socioeconomic status of women and changes in it as a result of processes of economic development in individual countries in five continents Economic development is supposed to remove impediments to the improvement in women's status In some developing countries researchers have found that instead of lessening the forces of restrictions economic development may in fact have strengthened them The editors call for a greater involvement of women as active participants in the process of dismantling social legal and institutional barriers to women's development

Economic Development and Women in the World Community Kartik C. Roy, Clement Tisdell, Hans C.

Blomqvist, 1996 *Governance Institutions And Economic Development: Emerging China, India, East Asia And Brazil* Kartik C Roy, 2018-04-09 Roy's book is a rich and detailed study of various facets of economic and social development in ten countries both democratic and authoritarian Researchers and students will find here a wealth of information and statistics that can be mined to explore fundamental questions around state interventionism and modes of governance around democratisation authoritarianism and economic development around the factors driving the differential developmental performance of specific countries and around the desirability of economic growth at all costs It also provides a very useful starting point for considering the future of Asia as China's economic political and military strength continues to grow Jude A Howell Professor London School of Economics LSE London UK From the Foreword With over three decades worth of research and analysis Roy compares ten countries India Brazil Indonesia China Japan South Korea Singapore Vietnam Thailand and Malaysia in the role of the state in economic development Comprising of a rich body of work on state intervention and developmental states Roy postulate on the idea of virtuous and vicious interventionist states Institutions and Gender Empowerment in the Global Economy Kartik Chandra Roy, Hans-Christer Blomqvist, Cal Clark, 2008 Since women account for almost 50 percent of the world's population the sustainability of development of the global economy can be greatly impaired if the state authorities in individual countries pay less attention to the improvement in the socio economic status of women relative to men Improvement in socio economic status which facilitates empowerment of individuals is greatly dependent on conducive informal institutions and state institutions This book is the first of its kind to critically examine the role of these institutions in women's empowerment in five continents in the world The analysis of the role of institutions in individual countries is underpinned by a robust theoretical background presented in the first three chapters The chapters on individual countries also include a section dealing with recommendations for changes in state policies affecting women's empowerment

Economic Development in China, India and East Asia Kartik Chandra Roy, Hans-Christer Blomqvist, Cal Clark, 2012-01-01

This is an unusually rich and comprehensive comparative analysis of industrialisation and development in Asia Drawing on

the diverse experiences of Malaysia Singapore China India and more Roy Blomqvist and Clark skilfully tease out the common institutional threads and the subtle differences in their developmental trajectories An essential reading for all those interested in the lessons from Asian development Jude Howell London School of Economics UK This is a thorough and comprehensive study both in terms of country coverage and in depth analysis covering the economic development of all the major economies in the Asian continent namely China India Japan South Korea Taiwan Malaysia and Singapore Before embarking on analyses of different aspects of economic growth and development of these countries the authors present a thought provoking analysis of how institutional factors such as geography history of religion culture and political governance have been deeply interwoven with development dynamics to shape the growth and development trajectory that each country has subsequently followed Each country s development path consequently appeared almost be pre determined Japan s role as the lead country in technology transfer under the flying geese pattern of development is discussed however the emphasis has shifted of late to China India Korea Malaysia and Singapore the authors also propose that instead of discussing the failure of India to catch up with China in growth and development outcomes economists should be commenting on whether China bestowed with India s highly decentralized democratic governance structure and institutional rigidities would have been able to achieve the same results as that of India Only then will a true understanding and appreciation of India s achievements in economic growth and development emerge Economic Development in China India and East Asia will be warmly welcomed and appreciated by academics and researchers of international and development economics as well as Asian development and economics Policy makers and those involved in NGOs in the development and aid arenas will also find this of great interest

Institutions, Globalisation and Empowerment K. C. Roy, Jörn Sideras, 2006-01-01 Examining aspects of social and economic institutions and exploring their operation as a result of globalisation this book approaches the issue of globalisation from a perspective of how the forces of globalisation are transforming domestic social and economic institutions to create greater opportunities for empowerment in individual countries

Growth, Development and Poverty Alleviation in the Asia-Pacific Kartik Chandra Roy, Srikanta Chatterjee, 2007 This volume presents a variety of papers on issues related to growth development and poverty prepared by specialists in their particular development related fields While the living standards of most people around the world have improved over time in absolute terms many are still in desperate poverty The major bulk of humanity lives in the continent of Asia and it is here that some of the more spectacular contrasts in both economic growth and levels of affluence and destitution can be found Whether India and China can continue to grow as fast as they have done in recent years remains to be seen More importantly perhaps whether growth alone can reduce poverty in these countries and in others is a question that needs to be discussed and understood Outside of India and China the African continent particularly the nations in Sub Saharan Africa is home to large numbers of poor and deprived humanity Many of these countries are natural resource rich but that has not enabled many of them to achieve adequate growth and reduce

poverty As countries grow they put extra pressure on both global resources and the natural environment The question as to whether there are finite limits to economic growth in a global sense is one that has long exercised thinkers Technological progress has often enabled countries to economise on resource use without sacrificing growth Whether that can continue indefinitely is also a question that has acquired a new urgency with the recent faster growth experience of the most populous countries

Culture and Economics in the Global Community Kensei Hiwaki, 2016-05-13 Many of the concepts values and basic assumptions on which modern economic and business theory is based do not translate into or convey the same meaning in non European languages or non Western cultures as they do in Western societies This results in a mismatch between what Many of the concepts values and basic assumptions on which modern economic and business theory is based do not translate into or convey the same meaning in non European languages or non Western cultures as they do in Western societies This results in a mismatch between what have now become global economic values and local cultural ones Kensei Hiwaki considers a new paradigm that a sound culture is needed to underpin development employment and trade and an optimal development path This concept is discussed against the background of the author s contention that his own Japanese society has succumbed to unsustainable modern tendencies leading to the antithesis of sustainable development and placing the society and economy in a credibility trap into which it is predicted other countries like China might also fall Professor Hiwaki presents a detailed theoretical framework for balanced socioeconomic development relevant to sustainable development of the global community explaining the pivotal concepts on which it is based as well as the institutional and practical implications of adopting the paradigm including new approaches to taxation employment trade multi media communications and global governance *Culture and Economics in the Global Community* is a challenging but ultimately hopeful book that introduces new perspectives for leaders in the political arena in business in development agencies and to researchers and others with a professional or academic interest in economics trade governance and environmental issues social policy or cultural anthropology
