Economic Engagements With Art Annual Supplement To Volume 31 History Of Political Economy:

Economic Engagements with Art Neil De Marchi, Craufurd D. Goodwin, 1999 Economists historically have had very little to say about art In the latter part of the twentieth century however difficult issues such as pricing and art valuation the influence of the fashionable on pricing and the nature of auction all began to be explored Economic Engagements with Art suggests that taste and fashion in art need not be mysterious or outside rational discourse and that these matters can be studied by economists to the benefit of the discipline On Music, Money and Markets Thomas Baumert, Francisco Cabrillo, 2023-12-30 Did you know that Bach invested in mines That Rossini improved his income by running casinos in the opera houses which on weekends performed his operas Or that Puccini composed shorter arias to make them fit the length of gramophone disks as they reported him huge revenues Or who was in financial terms the most successful classical composer in history This book the first of its kind studies and compares the finances of twenty classical composers in their historical and economical context Each chapter details and quantifies the sources of income of these musicians wages royalties subsidies percentages over the number of performances arrangements investments in the musical sector etc thus allowing to estimate the income they obtained due to their artistic primarily compositional but also related activities In addition it also estimates the composer s expenditures thus drawing a relatively complete image of their personal finances This not only allows to conclude to create a ranking of composers according to their economic success but more importantly for the first time gives an accurate image of the financial situation of a broad set of composers This allows to correct many false believes while also giving new insights on the relation between economics and music history **A History of Economic Theory and Method** Robert B. Ekelund, Jr., Robert F. Hébert, 2013-08-30 Known for its clarity comprehensiveness and balance the latest edition of A History of Economic Theory and Method continues that tradition of excellence Ekelund and Hébert s survey provides historical and international contexts for how economic models have served social needs throughout the centuries beginning with the ancient Greeks through the present time The authors not only trace ideas that have persisted but skillfully demonstrate that past discredited ideas also have a way of spawning critical thinking and encouraging new directions in economic analysis Coverage that distinguishes the Sixth Edition from its predecessors includes a detailed analysis of economic solutions by John Stuart Mill and Edwin Chadwick to problems raised by the Industrial Revolution the role of psychology and experiments in understanding demand and consumer behavior discussions of modern economic theory as it interrelates with other social sciences and a close look at the historical development of the critical role of entrepreneurship both in its productive and unproductive variants The authors creative approach gives readers a feel for the thought processes of the great minds in economics and underscores key ideas impacting contemporary thought and practice Well crafted discussions are further enriched by absorbing examples and figures Thorough suggested reading lists give options for more in depth explorations by interested readers William Stanley Jevons and the Making of Modern Economics Harro

Sublime Economy Jack Amariglio,Joseph W. Childers,Stephen E. Cullenberg,2008-11-25 Bringing together economists literary and art critics philosophers sociologists and others this book fosters the emergence of a rich set of concerns about the intersections of art aesthetics and economics **Class, Gender, and Sexuality in Thomas Gainsborough's Blue Boy**

Valerie Hedquist,2019-07-08 The reception of Thomas Gainsborough s Blue Boy from its origins to its appearances in contemporary visual culture reveals how its popularity was achieved and maintained by diverse audiences and in varied venues Performative manifestations resulted in contradictory characterizations of the painted youth as an aristocrat or a regular fellow as masculine or feminine or as heterosexual or gay In private and public spaces where viewers saw the actual painting and where living and rendered replicas circulated Gainsborough s painting was often the centerpiece where dominant and subordinate classes met gender identities were enacted and sexuality was implicitly or overtly expressed

Economics of Art Auctions Gianfranco Mossetto,Marilena Vecco,2002 Dance, Spectacle, and the Body Politick, 1250-1750 Jennifer Nevile,2008 An engaging overview of dance from the Medieval era through the Baroque Talking Prices Olav Velthuis,2013-10-24 How do dealers price contemporary art in a world where objective criteria seem absent Talking Prices is the first book to examine this question from a sociological perspective On the basis of a wide range of qualitative and quantitative data including interviews with art dealers in New York and Amsterdam Olav Velthuis shows how contemporary art galleries juggle the contradictory logics of art and economics In doing so they rely on a highly ritualized business repertoire For instance a sharp distinction between a gallery s museumlike front space and its businesslike back space safeguards the separation of art from commerce Velthuis shows that prices far from being abstract numbers convey rich meanings to trading partners that extend well beyond the works of art A high price may indicate not only the quality of a work but also the identity of collectors who bought it before the artist s reputation was established Such meanings are far from unequivocal For some a high price may be a symbol of status for others it is a symbol of fraud Whereas sociological thought has long viewed prices as reducing qualities to quantities this pathbreaking and engagingly written book reveals the rich world behind these numerical values Art dealers distinguish different types of prices and attach moral significance to them Thus the price mechanism constitutes a symbolic system akin to language Theologians and Contract Law Wim Decock,2013 In Theologians and Contract Law Wim Decock offers an account of the moral roots of modern contract law He explains why theologians in the sixteenth and seventeenth centuries built a systematic contract law around the principles of freedom and fairness Anthropological Futures Michael M. J. Fischer,2009-06-26 A leading anthropological theorist investigates how emerging knowledge formations in molecular biology environmental studies computer science and bioengineering are transforming some of anthropologys key concepts Rubens and the Dominican Church in Antwerp

Bellamy, 2019-03-15 In *The Language of Fruit* Liz Bellamy explores how poets playwrights and novelists from the Restoration

to the Romantic era represented fruit and fruit trees in a period that saw significant changes in cultivation techniques the expansion of the range of available fruit varieties and the transformation of the mechanisms for their exchange and distribution Although her principal concern is with the representation of fruit within literary texts and genres she nevertheless grounds her analysis in the consideration of what actually happened in the gardens and orchards of the past As Bellamy progresses through sections devoted to specific literary genres three central characters come to the fore the apple long a symbol of natural abundance simplicity and English integrity the orange associated with trade and exchange until its naturalization as a British resident and the pineapple often figured as a cosseted and exotic child of indulgence epitomizing extravagant luxury She demonstrates how the portrayal of fruits within literary texts was complicated by symbolic associations derived from biblical and classical traditions often identifying fruit with female temptation and sexual desire Looking at seventeenth century poetry Restoration drama eighteenth century georgic and the Romantic novel as well as practical writings on fruit production and husbandry Bellamy shows the ways in which the meanings and inflections that accumulated around different kinds of fruit related to contemporary concepts of gender class and race Examining the intersection of literary tradition and horticultural innovation *The Language of Fruit* traces how writers from Andrew Marvell to Jane Austen responded to the challenges posed by the evolving social economic and symbolic functions of fruit over the long eighteenth century

Man-Made Future Iain Boyd Whyte, 2006-12-19 This anthology of essays by a group of distinguished scholars investigates post 1945 city planning in Britain not from a technical viewpoint but as a polemical visual and educational phenomenon shifting the focus of scholarly interest towards the often neglected emotional and aesthetic aspects of post war planning Each essay is grounded in original archival research and sheds new light on this critical era in the development of modern town planning This collection is a valuable resource for architectural social and urban historians as well as students and researchers offering new insights into the development of the mid twentieth century city
