The Sustainability Curriculum John Blewitt,Cedric Cullingford,2013-06-17 The links between

education and sustainable development are deepening although subject to much controversy and debate The success of the sustainability discourse depends both on the pedagogic and research functions of higher education Similarly for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development but also to be responsive to scrutiny of its own practices in relation to sustainability Among professionals in higher education sustainable development has its supporters and detractors It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines Although it is not currently an academic discipline in its own right increasing public and professional familiarity with the term and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines institutional practices fields of study and methods of enquiry The contributors drawn from a wide range of disciplines perspectives educational levels and institutional contexts examine the purpose of the modern university and the nature of sustainable education which includes exploring links to social movements for sustainability projects curriculum change culture and biodiversity values relating to gender equality and global responsibility and case studies on the transformation or otherwise of some specific disciplines

Complexity and Evolution David S. Wilson, Alan Kirman, 2016-08-19 An exploration of how approaches that draw on evolutionary theory and complexity science can advance our understanding of economics Two widely heralded yet contested approaches to economics have emerged in recent years one emphasizes evolutionary theory in terms of individuals and institutions the other views economies as complex adaptive systems In this book leading scholars examine these two bodies of theory exploring their possible impact on economics Relevant concepts from evolutionary theory drawn on by the contributors include the distinction between proximate and ultimate causation multilevel selection cultural change as an evolutionary process and human psychology as a product of gene culture coevolution Applicable ideas from complexity theory include self organization fractals chaos theory sensitive dependence basins of attraction and path dependence The contributors discuss a synthesis of complexity and evolutionary approaches and the challenges that emerge Focusing on evolutionary behavioral economics and the evolution of institutions they offer practical applications and point to avenues for future research Contributors Robert Axtell Jenna Bednar Eric D Beinhocker Adrian V Bell Terence C Burnham Julia Chelen David Colander Iain D Couzin Thomas E Currie Joshua M Epstein Daniel Fricke Herbert Gintis Paul W Glimcher John Gowdy Thorsten Hens Michael E Hochberg Alan Kirman Robert Kurzban Leonhard Lades Stephen E G Lea John E Mayfield Mariana Mazzucato Kevin McCabe John F Padgett Scott E Page Karthik Panchanathan Peter J Richerson Peter Schuster Georg Schwesinger Rajiv Sethi Enrico Spolaore Sven Steinmo Miriam Teschl Peter Turchin Jeroen C J M van den Bergh Sander E van der Leeuw Romain Wacziarg John J Wallis David S Wilson Ulrich Witt
