Economic Prehistory:

Economic Prehistory Gregory K. Dow, Clyde G. Reed, 2023-01-05 Around 15 000 years ago almost all humans lived in small mobile foraging bands By about 5 000 years ago the first city states had appeared This radical transformation in human society laid the foundations for the modern world We use economic logic and archaeological evidence to explain six key elements in this revolution sedentism agriculture inequality warfare cities and states In our approach the ultimate cause of these events was climate change We show how shifts in climate interacted with geography to drive technological innovation and population growth The accumulation of population at especially rich locations led to creation of group property rights over land stratification into elite and commoner classes and warfare over land among rival elites This set the stage for urbanization based on manufacturing or military defense and for elite controlled states based on taxation Our closing chapter shows how these developments eventually resulted in contemporary global civilization

Economic Prehistory Grahame Clark, 2009-04-09 Throughout his career Grahame Clark has pioneered on a world scale the use of the archaeological record to document the economic and social life of prehistoric communities In Europe he was the first to employ the concept of the ecosystem in archaeology and to underscore the necessarily reciprocal relationship that exists between culture and environment In Britain he has played a major role in moving archaeology away from its preoccupation with typology and spurring on the newly emergent discipline of bioarchaeology Economic Prehistory reflects all these concerns Following a comprehensive bibliography of Professor Clark's writing the volume opens with a series of classic papers on basic subsistence activities such as seal hunting whaling fowling fishing forest clearance farming and stock raising Subsequent sections then deal with world prehistory and the thorny relationship between archaeology education and society The volume closes with a retrospective which looks critically at such figures of the past as Gordon Childe and Mortimer Wheeler and to the author's own renowned excavations at the Mesolithic site of Starr Carr
