The Economies of Central Asia Richard Pomfret, 2014-07-14 This book is the first general introduction to the economies of central Asia specifically the recently independent countries of Uzbekistan Kazakhstan Tajikistan Kyrgyzstan and Turkmenistan Richard Pomfret provides a historical and structural analysis of this area of the former Soviet Union with an emphasis on their economic situation since

independence With the strategic significance of this part of the world growing by the week this book provides an invaluable source of material for understanding what has been for Westerners a very mysterious part of the world The first part of the book deals with the five countries common features determined by geography and their role in the Soviet division of labor which left many parts of the region heavily dependent on a cotton monoculture and facing serious environmental problems notably the shrinking of the Aral Sea and contamination from nuclear testing The author goes on to deal with the countries as national economies Finally he examines common problems facing the countries since they gained independence in late 1991 These last chapters focus on the immediate economic problems of 1992 and 1993 economic transition and the decision whether to remain within the ruble zone as well as long term development issues and international economic relations Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 The World Bank Research Program 2004 World Bank,2005 The World Bank s research is intended to address critical issues and problems facing member governments in developing and transition economies How can the governments of the poorest countries generate enough revenue to provide the education and health services essential to reducing poverty and promoting growth and development How can poor countries attract investors to build the infrastructure their economies need How can they develop systems to bring clean water to the 2 billion people without it today How can they train teachers and bring to class the 115 million children who have not yet received any education And how can rich countries be persuaded to lower market barriers helping to reverse the decline in export prices for poor countries that has left them earning less from trade today than in the 1970s These are the types of questions that are addressed in this edition of The World Bank Research Program Abstracts from Current Studies This volume reports on research projects initiated under way or completed from July 2003 through June 2004 It covers 151 research projects on several broad development related issues including agriculture health education environment infrastructure investment climate and more The abstract for each project describes the questions addressed the analytic methods used the findings to date and policy implications Farm Sector Restructuring in Belarus Csaba Csáki,Zvi Lerman,Serge? Sotnikov,2000 Agriculture remains the main source of employment and livelihood for the large rural population of many transition countries especially among the former Soviet republics Accordingly the World Bank continuously monitors the progress of land reform and farm restructuring in the region because of the potential impact of these processes on rural development and poverty alleviation in rural areas The present study on Belarus is the latest addition to a long and growing series of World Bank publications on land reform and farm restructuring in the former

socialist countries of Europe and Central Asia The unique features of all these publications is their reliance on first hand empirical information collected through extensive farm surveys of various rural constituencies Analysis of survey findings enables the World Bank to base its policy dialogue with governments in the region on solid empirical facts making the Bank s recommendations more credible and relevant The survey findings in this volume will provide a platform for useful policy discussions with this country s government and supply international donors that are active there with essential information to design their strategic programs

Failed Transition, Bleak Future? Hooman Peimani, 2002-04-30 Peimani challenges the practical indifference of many Western and non Western countries with interests in Central Asia and the Caucasus to their plight Independence in 1991 suddenly worsened all the economic and social problems of the countries of the Caucasus Azerbaijan Armenia and Georgia and Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan Their failure to address their numerous economic problems and to develop their economies has created a suitable ground for the rise of social and political popular dissent including ethnic conflicts in all these multi ethnic countries Concerned about the stability of their political systems their ruling elites have all opted for authoritarianism The prevailing intolerance of dissent and the suppression of opposition political parties have paved the way for the emergence of anti government extremist ideologies and political groups The domestic situation has become ripe for the rise of violent political activities and ethnic conflicts with a great possibility for their escalation to civil wars The ethnic structure of both the Caucasus and Central Asia makes their development into inter state wars a strong possibility The unsettled ethnic and territorial conflicts within and between countries which turned into wars in the early 1990s could easily re emerge There is a potential for the further escalation of military conflicts in those regions because of the intentional or unintentional intervention of Iran China Turkey Russia and the United States which have long term interests in the two regions Given the geographical characteristics of the Caucasus and Central Asia as a link between Asia and Europe war and instability in those regions could destabilize the two continents hosting six declared nuclear powers Of particular interest to scholars and other researchers involved with Eurasian Central Asian and Caucasian countries
