Economic Thinking And Pollution Problems:

Economic Thinking and Pollution Problems Douglas Auld,1972-12-15 The purpose of this collection is to provide the student with an introduction to the way in which the discipline of economics tackles the problems posed in affluent societies by their various waste products Pollution economics introduces a student to aspects of price economics public finance and political economy in relation to a pressing and complex public concern The work includes a number of Canadian statements on pollution and its control in this country and gives the text of two recent pieces of legislation on the topic The selections in this volume present a wide variety of opinions ideas and facts about the economic dimension of the ecological crisis Pollution costs money pollution abatement also costs money and these costs will have to be paid somehow by some people The contributors politicians businessmen and professors explore the problem of pollution and its control as each sees it and the volume as a whole should help encourage a greater awareness both of economics as a way of thinking and of the difficulties in making the right public policies

Economic Thinking and Pollution Problems Douglas Allen Lauriston Auld,1972
Cost Analysis of Water Pollution Control Dennis P. Tihansky,1973 *New Concepts in Air Pollution Research* Willums,2013-11-11 Recent publications on the fate of our limited earth have stirred up vivid worldwide discussions during which it became clear that our knowledge of the complex ecosystem is far from sufficient today All planning and predictive models are only as good as the input data they are based on Improved research methods and new ideas and impulses are therefore urgently needed both to stimulate the specialized scientists and to supply the concerned citizen with the updated background information necessary to make responsible decisions Generally most of the serious publications in the field of pollution are written by well known and well established scientists It is beyond doubt that their experience and profound knowledge is an essential contribution to the understanding of our environment But one whole group of scientists has not been able to present their ideas and concerns to a broader scientific or non scientific readership the young scientist at the beginning of his career He belongs to a new generation of scientists who have studied during a time when environmental concern has become a vital part of the university life Now in the first decade of his academic career his educational approach and his developing expertise in this field may synthesize ideas that will fall on what is already a fertile ground for new concepts that are urgently needed to solve the environmental crisis
